Why Mrs. Powell Chose Another. WESTMINSTER, Md., May 25 .- In the breach of promise suit brought by the aged justice of the peace, D. Calvin Warner, against Mrs. Emma Powell, Mrs. Powell testified: "The intimacy between myself and the plaintiff commenced in the spring of 1803, and continued up until February, 1804, when I smelled liquor on him, which he had in the beginning concealed by chewing coffee; his anxiety to secure loans of money, and then finally the report which came to me saying that he was the father of an illegitimate child induced me to break the engagement."

With him, it was determined, must go Inspec tor Williams, the preponderating forces in the board having settled finally into the conviction that a complete reform of the department would be impossible with these two men in it. Yesterday Inspector Williams was retired at his own request. He will get a pension of \$1,750 a year.

TOPICS OF THE TIMES.

The numerous bridges on the Catawissa Pertinent Paragraphs From the Reporters' Pens and Penclis.

Most of our business man and property owners continue to stand in their own light. They do not attempt to better things but stand idly by waiting, Micawber like, for something to turn up. It is a great loss of time to try to convince them that times can be made better if they, themselves, will help to make them. They trust to luck; they always do, no matter if school keeps or not.

All property owners are not rent sharks, but we have in our midst people, owners of rookerles, who have no hearts at all. They won't come down with the rents tions afforded tenants is a disgrace to civilization. They are exacting in their demands for the rents and take the workingman's last penny to satisfy them, leaving the tenants to get along as best they can for the common necessaries of life. We have these kind of sharks living not a thousand miles from the HERALD

Fifty five towns and cities in England now destroy garbage by burning, and use the heat to generate electricity for street lighting. That's economy. Now why I not utilize cats in a like manner. Some cats are very electrical-so it is said.

A friend of mine has written from New York concerning a cold May in 1831 : This spring is almost a duplicate of the spring The annual meeting of the National of 1834, except that we have had heavy Educational Association, which is to be frosts instead of snow and light frost. Ice formed as thick in May of that year as window glass. On May 14 I hired out to work on a farm, two miles from Cort landt. The spring had been very simishould miss what promises to be one of las to this. Fruit trees were in blossom the day I commenced working, but it begau to grow cold and coatinued to do so for three days. Finally it grew so cold that Mr. Howe, for whom I worked, had to wear an overcoat and mittens while ploughing. On the 17th it commenced mowing very fast, and the flakes were soon eight to ten inches deep. On the 18th and 19th it was very cold. Potatoes that were covered up with straw in the barn were frozen. On the 19th and 20th we drew wood on a sled. The sleighing at that time was good. Nearly all the leaves dropped off the trees in the forest. * *

If the electricity sharps keep on with their discoveries we may some day ere long be able to dismiss the night, get along without labor and travel whither we will by pressing upon a button while sitting in a chair. Now we are told, says an exchange, that we may have the night illuminated with the phosphorescence of the fire fly and with a light so innocent and free from heat that we may carry it around in our pockets and have its light whenever we want it by touching a button. An arrangement of this sort will be very grateful to people who do not care to have electric wires about their premises, that may set things afire and knock things over, when they are out of shape. Those persons who were in a hurry to pay the tax on their incomes before they found out whether it was actually due will not have as much trouble getting it back as was anticipated. Under a general law the Internal Revenue Commissioner is empowered to refund taxes wrongly collected. The amount paid on accoun of the income tax and which must be refunded amounts to only \$73,000.

Denmark's police, when they find drunken man on the street summon a cab, place him inside and drive to the polic station, where he is detained until sober Then he is driven home, the police never leaving him until he is safe in his family The cabman then makes his charge, the police surgeon his, the constables theirs and this bill is presented to the proprietor of the establishment where the culprit took his last and overpowering glass. This system, if introduced in this country, would tend to reduce the appalling drunkenness.

The Striking Wallshalak Weavern

Nothing was Pa. May 27.—The strik-ing weavers of the Woodstock mills have been seeking to effect a compromise with their employers all last week, but so far their efforts have been unsuccessful. The Strike Situation at Providence. PROVIDENCE, May 21.—There is little or no change in the industrial situation here. The strikers will hold a meeting this after-noon to discuss the proposition of Hon. E L. Gannon to submit the questions at is sue to arbitration. Mr. Gannon, who is an ex-district master workman of the Knights of Labor thinks that if the op-eratives at the Providence and National mills should effect a settlement the operatives in the other mills would return to work.
