BEATS VIGILANT AND VOLUNTEER.

The Race Run with Alt and Spread, and the New Yacht Gained at flyery Point. Superiority of the Pin Keel Over the Centerboard Demonstrated,

Nawyour, 15. L. Aug. 1.—The Defender best the Virliant in the can of force two miles from New London to this point, and but her so builty that the latter's friends must now admit that the new book is ber at then the old. How much better cannot be stated, as no reasonable commarifender of 1905 can be made, only by the handful of people who know about what handful of people who know about what the Defender will give to the Vigilant in the matter of time allowance. An Associated Press reporter was told by a yachteman who is in a position to know that the Defender should allow the Vigilant four minutes, or the reabouts. In a forty mile race. If this is true the Defender did all that could have been asked of her, beat-looking after a contract there for the State-

The weather was in favor of the Vigilant all the way through. On leaving New London it was more than free wind, It was brisk, but the big fellows were able to earry all sail, including club topsails, and the water was smooth enough to suit the Vigliant in her very best days.

From start to finish the Defender gained on the Vigilant, and came home so far ahead that the doubting Thomases, who were asking each other, referring to the America's cup races, "Will she do?" are now saying at least, "Well, she's the best boat we ever had," and that confession from these people is to be thought over more than once. It means that the spion-did win of the keel boat shows that she is ahead that the doubting Thomases, who improving right along in form.

If the advancement continues at the ratio displayed between the sail of Tucsday and that of yesterday the Vigilant will be nowhere in today's race. It was almostarun with spinnakers yesterday, and yet the Defender gained at every point. The finish showed the new boat to be over twelve minutes to the good on

On leaving New London the yachts sailed down with a beam wind to the race. The Defender had had her steering gear patched up during the night, and her sallers were smart enough to get her over the starting line over a minute ahead of the Vigilant. The Volunteer was pretty quick, and went away five seconds after the Vigilant. The Jubilee was there, but for some reason or other she did not start with the others, and this fact lessened the interest in the whole proceeding, as every-body wanted to know what General Paine's vessel could do with the champion

of 1893 and the new fin keel yacht.

The boats which did start had a good race. There was a fine breeze, which was always fair. There were a good many people over at Fort Adams to see the finish, and all were courteously received by Lleu-

tenant Sampson, the officer of the day. When the Defender hove in sight behind the hills at Castle Point she was speedily picked out by name, her almost straight up and down gaff making her easy to be distinguished. Soon the Vigilant's lofty club topsail was seen over the point. There was a good two miles between her and the Defender.

The result of yesterday's race shows that the fight for the cup on the American side will be made by either Defender or Vigilant. The Jubilee, by her refusal to start, indicates that she does not want to go into a race when there is a blow, and a victory in such weather can not be of great value just now, for the chances are eight to one that the cup races will be sailed in light weather, and that is the game the Val-

kyrie III was built for.
The following table shows the time at

Why the Jubile	e Did Not	Race.

NEW YORK, Aug. 1.—It appears that General Payne did not enter the Jubilee yesterday because the boat met with an accident on Tuesday as the yacht was entering the harbor of New London. She started the turn buckle of her port halvard and became incapacitated for duty. She was towed here last night and will be all ready for the race for the Goelet cup to-

This includes the pointing out of the resting place of the Williams sisters, whom he himself assisted in secreting after they were murdered. He will tell how they were murdered and exactly how all their bodies were hamiled. He will also give full and explicit information concerning the murder of Pietzel and his two chli-dren, and of Mrs. Julia Connors and her daughter Pearl.

In short, this man is the only other living person aside from Quinlan who can tell the story of the murders in the char-nel house at Sixty-third and Wallaca streets. Aside from Quinlan he is the only man who can tell of Holmes' orines in a way that will bring forth evidences of Holmes' guilt. The mention of his name by the police made Janitor Quinlan turn pair and refuse to talk further, and a confession from Quinlan is almost as sured, but will come too late, as Allen is to be the state's witness.

It has been arranged to request his par-don from the governor of Arkansas if he will give his testimony with She understanding that he will not be presented in Illinois for complicity in Holmes' frauds and crimes.

Another link in the chain binding Quin-Another link in the chain binding Quinlan to the alleged crimes of Holmes was
forged yesterday by an admission made
by Quinlan when questioned by Chief of
Police Badenoch. He said he was hired
by a man named Allen to go to Fort
Worth, Tex. Quinlan had previously
claimed that he had no knowledge of any
crimes committed by Holmes, although
has had admitted that he Fore Worth. he had admitted that in Fort Worth he met and knew a man called "Mascot." Now that Allen and "Mascot" are prac-tically proven to be one and the same man Quinlan's contradictory stories have placed him in a still worse light with the

Experiments were made yesterday with the liquid found in the bottom of the vat in the cellar of Holmes' house, and it was found that whenever mixed with benzine or kerosene oll it would emit a vapor so deadly that no human being could live in it. Whether or not Holmes used the vapor for suffocating his victims is not known, but the police are inclined to favor such a

theory.

Miss Jennie Thompson, known also as Mrs. Evelyn Stewart, is being looked for by the Englewood police officers. She was employed by Holmes as a stenographer up to a short time before he left Chicago. Her statement is want I in regard to what she saw and heard in the "castle"

entered suit against the present holders of property owned by the Williams sisters. The suit is brought at the instance of the heirs of the girls, and it is claimed that the deeds were forged by Holmes. Allen, Send for Special Catalogue on alias Hatch, the Arkansas convict, who is so anxious to tell his connection with the murders, was at one time in the employ of Holmes in this city. Allen went by the name of Mascot in this city, and it is be-lieved here that he can tell a great deal about Holmes and his transactions if he wants to. Allen was an ex-convict from the prison at Joliet.

While Holmes, or Pratt, as he was known here, was living in this city he started to put up a large building. It was objected to on the ground that it was a fire trap and the authorities forced him to remodel it somewhat. In view of the recent developments in Chicago the authorities have made an investigation of the building, which leaves no room for doubt that Holmes had planned it for a death trap. One room at the top of the house has twelve exits by which a person can escape, while an enclosed chute runs down to the basement, in which a body could be transferred without any one being the wiser In this basement a large archway had been built over the sewer in such a way that he could easily put in a trap door opening into the sewer. Under the floor of the house was found a large pit, the intended use of which can only be conjec-tured. Holmes probably intended this building to be used as he afterwards used his house in Chicago.

Says Miss Cigrand Is in a Convent.

PHILADELPHIA, Aug. 1.-H. H. Holmes was seen in his cell by a reporter, and talked freely about the charges made against him, especially those relating to Emily Cigrand. He admitted that he had betrayed the girl in Chicago, and that she had afterwards told this fact to a priest, who insisted that a marriage ceremony be performed. Holmes says that he took her to an obscure place in Minnesota, and married her under an assumed name, ceremony being fraudulent. Pat Quin-lan, he declared, knew of Holmes' relations with the girl, having found her in his room one night. In May, 1822, the prisoner continued, Miss Cigrand left his employ and went into a convent, where she Quinlan, he asserts, knows all about her and can produce her at any
