

Validity of the Chinese Exclusion Act Now to be Tested. CHICAGO, Aug. 2.—The validity of the Chinese exclusion act has been called into question by the arrest of four Chinamen at Detroit, and it is probable that Judge Grosscup, of the United States court, will be called upon to render a decision upon which the fate of the new law may depend.

Attorney Springer, of Detroit, intercepted the deputy United States marshal here, who had the four men in custody, and a writ was issued compelling the marshal to show cause why the Chinamen should not be released on the ground that the charges made in the warrants were too vague.

Old people who require medicine to regulate the bowels and kidneys will find the true remedy in Electric Bitters. This medicine does not stimulate and contains no whiskey or other intoxicant, but acts as a tonic and alterative. It acts mildly on the stomach and bowels, adding strength and giving tone to the organs, thereby aiding nature in the performance of its functions.

RAILROAD NEWS.

Business is Reported Brisk on all the Lines in This Section. Close onto 1000 cars are in the P. & R. shops in Reading awaiting repairs. Large consignments of steel rails are being shipped over the P. & R. from Steelton.

Tourist travel thus far this summer is about 33 per cent. more than last season. "Daddy" Mason, one of the Adams Express messengers on the Pennsylvania R. R. line between Philadelphia and Pottsville, is supposed to be the oldest active railway express messenger in the United States. He has been in the service for over 41 years.

A number of crews on the P. & R. are compelled to make extra trips in order to handle the vast amount of business. It is stated in Chicago that the P. & R. has leased docks in that city for ten years with an option to purchase for \$100,000.

Owing to the scarcity of castings, a number of new cars in construction for the Pennsylvania are being considerably delayed. On account of the rush of business a number of employes at the P. & R. freight stations in Reading are working twelve hours a day.

It is probable that freight traffic will take a big boom this fall. A scarcity of cars is at present inconveniencing several of the big roads. For attempting to wreck a passenger train on a western road Case Waterman was sentenced to thirty years' imprisonment in the penitentiary.

George Miller, for a number of years in the employ of the P. S. V. at Port Carbon, has been appointed keeper of locomotives, with headquarters at Reading. The P. & R. officials are arranging an entire new schedule of passenger rates, not only to meet the cheap competition of trolley cars, but also where there is no electric competition.

It required forty-four hours to go from New York to St. Louis twenty years ago. At present only twenty-eight and a half hours are consumed in the journey. The increase in speed amounts to almost 50 per cent. It is said the number of ties on the Pennsylvania system, between New York and Pittsburg, approximates 265,000,000. A new tie costs about forty cents and its average period of service is about six years.

The Pennsylvania is experimenting with the Moskvito system of electric lighting of cars. The dynamo is clamped to the axle of the car, which also acts as the axle of the dynamo. A storage battery under the car holds the electricity for use when the car is not in motion. A switch board in the front of the car controls the light.

The increasing coal shipments to the New England ports have been the means of causing the P. & R. receivers to ask the United States Circuit Court permission to contract for the construction of a large ocean tug, a harbor tug and six coal barges. The ocean tug will be about 167 feet and the harbor tug 90 feet long. The barges will have a capacity of 1000 tons each. With these additions the P. & R. fleet will consist of seven steam colliers, eight steam tugs, 102 barges, thirty-one sea-going barges and eleven car boats.

Babies made lappy with Luk's Syrup. Final Excursion. The second and last excursion to Atlantic City over the Philadelphia & Reading railroad will take place on August 22nd. Full particulars will be announced in due time.

A Large Waist is not generally considered a necessary adjunct to the grace, beauty or symmetry of the womanly form. Within the body, however, is a great waste made necessary according to the condition of things—continually in process and requiring the perfect action of all bodily functions to absorb or dispel the refuse. When there is irregularity or inaction, ladies who value a clean, pure, healthy body will take Dr. Pierce's Favorite Prescription—the only remedy for woman which being once used is always in favor.

To those about to become mothers, it is a priceless boon, for it lessens the pains and perils of childbirth, shortens labor, promotes an abundant secretion of nourishment for the child and shortens the period of confinement. Dr. Pierce's Pellets cure biliousness, constipation, sick headache, indigestion, or dyspepsia, and kindred diseases.
