# Afoot or on Horseback

Means a condition of uncertainty. That's just the condition of any man who wants to push his business and hesitates for a moment in regard to advertising. Those who are shrewdest select the best mediums and advertise judiciously. Such wise advertisers are found every month in the columns of the Evening Herald. They know its worth. They know that it is the only daily in the largest town in the county. These shrewd and clever advertisers know what they are about. They are never "afoot or on horseback," but are always leading the procession.

THE act of Congress, under the provisions of which the St. Louis of the American line will shortly make a speed trial in English waters, under government supervision, provides for the use of certain grades of steam ships by the government as auxilliary cruisers in case of war. Under this arrangement Uncle Sam becomes the practical possessor of those four fleet ships, the Paris, New York, St. Louis and St. Paul, and when it is considered that it costs about \$600,000 per annum to run vessels like the cruiser Columbia, the wisdom of the law is so apparent that it is surprising it was so long deferred. The act also stimulates American shipbuilding, which is rapidly gaining a superior standing among the older nations who have given more aid to this branch of industry than we have.

Left Church to Fight Fire.

POMONA, N.J., Aug. 19 .- The forest fires, which have been burning intermittently in this vicinity since last Tuesday night, got a fresh start yesterday, and gave the good people of Absecon a thorough fright. They were for the most part at church when the alarm was given that the fires had increased in volume and were approaching the town from the south. The citizens were seen out in full force, and every man, woman and child who was able to do so took a hand in fighting the flames. Eight residences were in great danger at various times, but the workers finally managed to throw up a sand em-bankment, three feet high and nearly five miles long, which checked the progress of the fire fiend, and Absecon is safe. flames are still burning flercely in the direction of Egg Harbor City, but no damage has as yet been reported from there.

Close to the scene of the disaster there is an old bituminous coal mine, or country bank, which has been abandoned for the past eight or ten years. The men were se suddenly evercome that they were unable to make their escape, and died almost instantly. Rescuing partles were sent into the cut immediately after the blast, but they had to abandon the attempt at rescue on account of the deadly gases.

Mgr. Satolli as a Pacifactor.

Washington, Aug. 19.—It is understood here that Mgr. Satolli is giving his attention to the question raised by the petition to himself for the suppression of the brewery conducted by the Benedictine monks at Beatty, Pa., with a view to harmoniz-ing the differences so as to placate the complainants and at the same time not deal harshly with the ecclesiasts who conduct the brewery. He is giving his attention to the petition not only from the point of view of the petitioners; but also considers the fact that the monks are native Germans, who cannot see the harry in the drinking of beer, made after the manner pursued in the fatherland. The affort will be to settle the dispute without any formal decision.
