Now THAT young Mariborough has made a he will not make ducks and drakes of the money the dear girl gave him.

THE United States Senate in 1897 will be Republican. The election on Tuesday settled that question. The places of Senators Gibson, of Maryland ; Hill, of New York, and Brice, of Ohio, will be filled by Republicans. There are no probabilities that the Democrats cast by women for the suffrage. This will make any gains, while on the other would leave an adverse masculine major-ity of over 90,000, besides the demonstrahand it is very likely that they will lose than that about 90 per cent. of the women other seats, and be in a decided minority when the Republican President takes his iseat.

THE "political cauldron" having boiled itself out for the time being, political matters will now subside for awhile until the muni-cipal elections draw near, when the free and independent American citizen will again let himself loose and dilate upon the superior merits and claims of Smith, Jones and Robin-son for constable, assessor or councilman, and the said S., J. and R. will spend more money to secure the privilege of being executed after election than would sufflee to buy him a house and lot. THE uncertainties of politics are brought out conspicuously in the election of Tuesday. last. On Thesday evening the Democrats were shouting pacans of joy over the apparent success of their ticket in the county, while Republicans were correspondingly depressed and the croakers were shaking their heads and saving "I told you so." pleased with the majority of 77,000. They estimate that at least 15,000 votes were taking the state through, do not care for the vote at all. It is recalled that the prohibitory con-

YOUR TIRED STOMACH.

"I have no appetite," you say, "and the little I do eat does me no good. At first it feels cold and dead in my stamach and by and by I have aches and pains that some-times go to my chest and back. I feel weak, low spirited and out of sorts all over. I fancy the demon of dyspepsia has got me." That's the way you talk, and no wonder. But wait a moment. Let us reason together. Perhaps thus far your stomach is merely tired. You have been eating too much, eating the wrong things, and irregularity. You Perhaps thus far your stomach is merely fired. You have beeu eating too much, eating the wrong things, and irregularly. You have given it too much to do, and like all lying things, when overworked, it stops at length from sheer exhaustion. There may not be an actually diseased condition as yet. Still it is nature's warning, and you must heed it or worse will follow. "But I must eat or starve," you say. True enough, but afety usually lies in middle courses. Here is one for you. You don't need drastic purges or exciting stimulants. Your condi-tion is one easily relieved if we go about it gently and sensibly. The tired stomach won't work under whip and spur. It has probably land too much of that already. What you require is something that is at once a food and a digester of food. Such an article is the Shaker Digestive Cordial, dis-covered and prepared by the Shaker Com-munity of Mt. Lehanon, N. Y. A COMBINATION OF RAILROADS

To Defeat the A. R. U. Strike on the Great Northern Road.

CHICAGO, Nov. 8 .- All railroads have positively assured President Hill, of the Great Northern, that as far as lies in their power they will co-operate with him in defeating the American Railway union strike now threatened upon his read. This information comes from officials of the Chicago, Milwaukee and St. Paul, the Burlington, the Illinois Central and the Chicago and Eastern Illinois systems This support of the Great Northern is an outgrowth of the plan pursued by the general managers of the different railroads of Chicago when they were dealing with the strike of last year.

Mr. Hill has engaged a detective agency to furnish him armed guards, and advised the Chicago railroad managers that his road would employ any railroad man out of work who had not committed an act of as in desperate circumstances, and it is violence in Chicago or elsewhere during feared that numbers will starve during the strike of 1894.

There are some 2,000 of these men in Chicago at the present time whose names were on the pay rolls of the railroads up to July 1, 1804. They include englineers, firsmen, brakemen and flagmen. While they have been "blacklisted" for nearly eighteen months, no charge has rested against them, but of having simply quit work when the strike began. THE RESERVOIR SYSTEM.

The question of water has become an important one in almost every county in this state. An insufficient supply has not only caused a great lass to the farming districts, but mining and industrial establishments have been more or less affected.

By reference to our news columns it will be found that the Borough Council of Ashhand has taken definite steps to increase their supply by the creetion of additional storage reservoirs and the driving of funnels and \$20,000. boring holes. The reservoir idea is no new one, but the present condition of things suggests that it might be growtly extended.

It would pay coal operators and manufacinners, and also agriculturalists, if a great reservoir system were provided which would he equal to the demands of the longest drouth. Sufficient rain fell in the early. part of this year to have provided all the water required by mines, factories and farms throughout the year, if only the samplus that is allowed to run to waste had been remined within reservoirs to be used as needed. The denulation of our forests and the constantly increasing damage from long drouths is bound to bring this reservoir question to the front. The saving to the great interests affected, agricultural, mining and industrial, would soon pay for many huge reservoirs and the necessary irrigating difebes and piping.

'The members of Shennodoah's Borough Conneil have and the question of additional storage reservoirs under advisement for some time, and it appears to be the universal opinion that such a system is the only practical remady to overcome the present diffienities. We are of the opinion that work in this direction cannot be inaugurated too

Some seven or eight boroughs in the state are affected by the decision. This act of 1802 is the one Senators Bradley and Rogers tried to have repealed by the legislature last winter.
