BONE OF CONTENTION.

Mahanoy City has a Board of Health, and since its organization has been a bone of much contention among local politicians. In fact, the appointments of that body, although the two officers only command a salary of \$25 and \$12 respectively, have figured quite prominently in the legislative halls at Harrisburg-in the Executive chamber and the Senate.

Usually interest in appointments of this nature materially diminishes after the successful applicants have been installed into office, but the people of our sister borough are an exception to the general rule. If an appointee doesn't "walk the chalk line" the powers that be either force him to wear the boss' collar, or accept the only alternative and give him the benefit of his years of ex-

"Things are different now," and instead of using the usual means of persuasion they now appeal to the palate by inviting the obstreperous office-holder to a sumptuous repost at Charley Brownmiller's cafe. We can imagine the seens, with Senator Coyle's representative and the diplomatic Comrey, (he of the military cognomen) drinking from the same brown jug and masticating turkey and cranberry sauce. Turkey is seasonable, far more than crow, although many at the festive board on this particular occasion have a great relish for the latter. This good fellowship among the Republicans across the hill is gratifying to their brethren here, and although we have not yet heard of any resignations being forwarded to the Governor as a sign of truce to the opposition, it will be productive of some good. Charley Brownmiller's till has now no "deficiency," and the editors of that town received a square meal.

ALTHOUGH "sealed packages" are objectionable, it might be a good way to transport some of the would-be national delegates.

PREPARE for Christmas by putting your holiday advertisement into shape.

THE Jury Commissioners have again filled the wheel, and drawn therefrom many who are dead and others who have moved out of the county. Shenandoah's quota is reduced considerably in this manner.

ARR we truly thankful for the foreign policy of the present administration?

PRACTICE AND THEORY.

We know of no class of artisans where practical and theoretical knowledge is combined to greater advantage than that of the man who works in the bowels of the earth digging the "dusty diamonds." This fact will be admitted by all, and in reading an article upon the subject in the Black Diamond. it was brought forcibly to our attention. The latest development in the preparation as well as the most improved methods of mining and bringing the ores to the surface is not the outcome of practical experience only, says the writer; they are the outcome of technical know dge applied by practical men. There is no reason why a thoroughly practical knowledge of mining should not be accompanied by considerable scientific attainments, and the mining engineer will find it. advantageous to have some acquaintance with nearly all the exact and physical It is true that no amount of purely scientific

or theoretical knowledge will fit a man to manage even a small mine in the absence of practical experience, but the capability of the practical man is greatly increased by scientific knowledge. A technical education consists not only of knowledge of the natural and mechanical forces, but it consists of a knowledge of how to apply them. If the miner depends on his own aptitude only, he will work in a comparatively narrow groove. We would, therefore, urge all young men studying mining to endeavor to obtain scientific knowledge as well as practical training. Apart from the material advantage to he derived from scientific knowledge, it trains the intellect, and often develops a taste for some special branch, the study of

PHILADRIPHIA contractors are hewing closer to the line, and the Senate investigating committee has just begun its work. The coincidence is quite marked.

which instead of being a task, becomes a

source of absorbing interest.

THERE are several Democratic politicians in town who would give greater thanks today if the Inspectorship plum would drop -in their back yard.

GEROME'S PERSONALITY.

An Affable Man, With a Military Manner and a Distinguished Air.

In person M. Gerome is a wiry, medium sized man, with a fine presence and very soldierlike in his creet carriage. His face is strong and full of character, his snapping eyes are searching and stern, and his fine head of gray hair and military mustache give him quite the appearance of a cavalry officer. Courteous manners, great affability and a most distinguished air make him an ideal type of gentleman. At a most absurdly early hour, when only milkmen, bakers and laborers are stirring, be may be seen in the Bois de Boulogne or on the Champs Elysees, astride of a handsome horse, taking his morning exer-cise, but long before the gay world of Paris is idling over its morning cup of coffee the artist has returned and is busily engaged before his easel or with his model

Twice each week he gives his forenoon to his pupils at the Government School of Fine Arts on the Rue Bonaparte. presence is eagerly awaited, and his ar-rival is the signal for absolute silence. On his entrance and after his hat and coat have been taken by one of the scholars, without loss of time he at once goes at the work of criticism, in which he is a model of brevity and coneiseness. His unerring eye at once detects the faults and wrong tendencies of each student, and nothing whatsoever escapes him. A pupil may de ceive himself, but not the master. Kindly advice to the serious, stinging rebukes to triflers, pleasant encouragement to hard workers and useful counsel to progressive men—such are the results of his visits. He is very liberal in his ideas and gladly es any style of work so long as it is healthy, honest and sincere. He takes great pride in the efforts of the pupils under him and does not besitate to climb many pairs of stairs to the most humble little studio to correct and advise some poor, struggling chap at work on a picture, and Gerome will sit and chat with him perience. His kindness and consideration to Americans in his studie are proverbial. 'A Famous French Painter," by Arthur Hoeber, in St. Nicholas.

THE ARMENIANS

A Gifted People Who Have Played a Con-

siderable Part In History. The Armenians are a civilized people, a people of great natural gifts, and a people who have played a considerable part in Since their ancient monarchy, which had suffered severely in the long and desolating wars between the Roman and Persian empires from the third to the seventh century of our era, was finally destroyed by the Seljukian Turks, a large part of the race has been forced to migrate from its ancient seats at the headwaters of the Euphrates, Tigris and Aras. Some of them went southwest to the mountain fastnesses of Cilicia, where another Armenian kingdom grew up in the twelfth century. Others drifted into Persia. Others moved northeastward and now form a large, industrious and prosperous population in Russian Transcaucasia, where many have entered the military or civil service of the czar and risen, as the Armenians used to rise long ago in the Byzantine empire, to posts of distinction and power. Russia's three best generals in her last Asiatic campaigns against the

Turks were Armenians. Others again have scattered themselves over the cities of Asia Minor and south-eastern Europe, where much of the local trade is in their hands. But a large numher, roughly estimated at from 1,300,000 to 1,700,000, remain in the old fatherland ound the great lake of Van, and on the plateaus and elevated valleys which stretch westward from Mount Ararat to Erzerum and Erzingbian. Here they are an agricultural and, to a less extent, a pastoral population, leading a simple, primitive life and desiring nothing more than to be permitted to lead it in peace and in fidelto them the symbol of nationality as well as the guide of life for 16 centuries.—Hon. James Bryce, M. P., in Century,

Choosing a Sweetheart.

A lady who has the credit of being versed in matters of the heart gives these few hints for the novice in love-they are cable to both sexes:

Do not, if you have always admired fair people more than dark, fall in love with a dark person. The fact that you have al-ways preferred fair people shows that your best chance of happiness would be with a

fair life partner. For instance, the man who has always admired small, slim girls should not choose for his wife a tall and well developed girl. Neither should the girl who that a man should be tall and broad be persuaded to accept a man who esses neither of these qualities.

People of different complexions and physiques will act in totally different ways under identically the same circumstances and it is easy to believe that every man and every woman knows instinctively with what style of helpmate he or she is

est likely to live in happiness Happy marriages have undoubtedly been known when these rules have not been public, followed; but, generally speaking, it is unwise for any one, in such a serious matter as marriage, to disregard in a moment of passion the fixed ideas and instincts of a fill, says: "

Mr. G. Cail passion the fixed ideas and instincts of a fill, says: "

owe my life. lifetime.-Edinburgh Scotsman

Nerves

Blood

Are inseparably connected. The former depend simply, solely, solidly upon the latter. If it is pure they are properly fed and there is no "nervousness." If it is impure they are fed on refuse, therefore cannot be strong and healthy, and the horrors of nervous prostration result. The only sensible way to cure is: Feed the nerves on pure blood. Make pure rich, red

blood and keep it pure, by taking Sarsaparilla

Aticura Munyon's

TORTURES A warm bath with Cuticura Soap, a single application of A Cuticura - (ointment),

the great skin cure, followed by mild doses of CUTICURA RESOLVENT (the new blood purifier), will afford instant relief, permit rest and sleep, and point to a speedy cure in every form of torturing, disfiguring skin humours.

Sold throughout the world. British depot: Rawnest, London. Pottes Davo & Crass Coar, Seston, U.S.A.

Mechanical Accuracy.

It is well known, of course, that great ccuracy has become an important factor in certain kinds of workmanship, an illustration of this fact being thus given by a mechanical journal: Not long ago, in a Philadelphia machine shop, the head man remarked concerning a device consisting of a short steel rod fitting into a hollow cylinder, the rod being three-quarters of an inch in diameter. Now, the fit was so perfect that it would slide freely in and out, but it was found that, if the red were taken out and held in the hand but a few seconds, the slight expansion caused by the warmth of the hand was enough to render it impossible to insert the rod until it had been allowed by gradual cooling to regain its normal size.

On the Street.

Kindly Old Gent-Ah, little girl, are ou going somewhere? Little Girl (with amazing superiority)-

Of course I am. You don't suppose I could go newhere, do you's—Detroit Free Press.

To Beautify the Complexion

-do not take the cosmetics, paints and powders which injure the skin, but take the powers which injure the skin, but take the easiest way to gain a beautiful color and a wholesome skin. Health is the greatest beautifier. The means to beauty, comfort, and health for women is Dr. Pierce's Favorite Prescription. Dull eyes, sallow or wrinkled face, and those "feelings of weakness." have their rise in the derangements peculiar to women.

women.

"Favorite Prescription" will build up, drengthen, and invigorate, every "rundown" or delicate woman by regulating and assisting all the natural functions.

To cure constipution, billiousness, indiges-ion, sick headache, take Dr. Pierce's Pellets.

A Fine Skin.

A fine skin is one of the most wonderful and lovely things in nature. It really consists of six lavers of networklike lace of the most exquisite texture, the filaments various in size and irregular in arrangement, lustrous as gossamers. The uppermost layer is a series of tiny facets forming a grain, which, when in perfection, shines not only with the reflected brilliancy of the under layers, but with a light of its own, producing that exquisite white-ness which would be destroyed by anything like rough friction. And people are so idiotic as to lay on creams and unguents, olutiments and other mysterious preparations of whose ingredients they know nothing. In a case that cropped up not long since it was proved in court that some stuff sold in a bottle at half a guinea cost exactly 3 farthings to make. Or was it I farthing! Some fraction of a penny .don Truth.

Belief in Six Hours.

Distressing kidney and bladder disease relieved in six hours by the "New Great South American Kidney Cure." This new remedy is a great surprise on account of its exceeding promptness in relieving pain in the bladder, kidneys, back and every part of the urinary passages in male or female. It relieves retention of water and pain in passing it almost immediately. If you want quick relief and cure this is your remedy, old by Isaac Shapira, druggist, 107 South

Why "Timothy" Grass Is So Called,

The forage grass known to the farmers of the United States as timothy is so called because first introduced and extensively cultivated in this country by one Timothy Hanson, a farmer of Maryland. This species of grass is well known in England and all over western continental Europe where it is grown extensively by most farmers between the Mediterranean and the North sea. The botanical name of this grass is Phleum prateuse. Timothy is known in the British isles as cat's tall grass and in several of our eastern states as herd, or herd's, grass. It was grown in large quantities in Maryland and Pennsylvania long before a spear of it had ever been seen in England, the first seed of it ever seen in the last named country being imported from America.-St. Louis Re

The Discovery Saved His Life.

Mr. G. Caillouette, Druggist, Beaversville, ll., says: "To Dr. King's New Discovery I we my life. Was taken with La Grippe and tried all the physicians for miles about, but of no avail and was given up and told I could not live. Having Dr. King's New Discovery in my store I sent for a bottle and began its use and from the first dose began to get better. and after using three bottles was up and about again. It is worth its weight in gold. We won't keep store or house without it." Get a free trial at A. Wasley's Drug Store.

The Claims of Long Descent. In a notice of a recent wedding the bride was described as "a fincal descendant of Edward III." A poetical friend, sending his congratulations, wrote:

From my earliest days I was led to believe That we all were descended from Adam and Eve; But poor Mrs. Brown-Jones-'tis very absurd-

Was only descended from Edward the Third.

Exact.

Bridegroom (who is receiving his bride's dowry)—Ten dollars are still wanting. Father-in-law-What? Oh, my daughter swallowed that \$10 when she was a child. -Fliegende Blatter.

Cure for Headache.

As a remedy for all forms of Headache Electric Bitters has proved to be the vary best. It effects a permanent cure and the most dreaded habitual sick headaches yield to its influence. We urge all who are afflicted to procure a bottle, and give this remedy a fair trial. In case of habitual constitution The One True Blood Purifier. \$1; 6 for \$5.

Prepared only by C. I. Hood & Co., Lowell, Mass.

Cold and Cough Cures.

Promptly Effectual in Curing Grip, Colds and Coughs, and a Sure Preventive of Pneumonia and All Lung Diseases.

Munyon's Cold Cure will positively break anyon's Con Cure will positively break
up the grip or a cold in a few hours if taken
as soon as the cold appears. When the cold
reaches the lungs and there is cough and
oppressed breathing Munyon's Cough Cure,
used in alternation with the Cold Care every
half hour, will effect an immediate cure.
When there is pain in the chest Munyon's
Plusters will give great relief and act as Plasters will give great relief and act as a protection. These remodies are a sure pre-ventive of pneumonia and lung troubles.

Why Poison Your System with dangerous drugs? Why not try Mun-yon's New and Improved Homosopathic Home Remedies? A separate specific for each disease. Absolutely harmless. Positive and permanent cures. At druggists, 25 cents

Personal letters to Professor Munyon, 1505 Arch street, Philadelphia, Pa., answered with fee medical advice for any disease.

Quite a Difference.

"What's the matter, William?" said the wealthy householder. "Anything gone Wrong? 'Not exactly gone wrong, sir; but I

want a new understanding. "My pay, sir."

"Why, you get very good wages for a

'Yes, sir. They does very well for a cook, sir. But I overheard you when you were talking to your friends, sir. You called me your chef."

'Well, you ought to be complimented." "Yes, sir. I'm complimented. But business is business. I can't be a chef for less than \$3,000 a year. Wages is all right for a cook, but a chef has to have a salary."— Washington Star.

How to Prevent Croup.

SOME READING THAT WILL PROVE INTER-ESTING TO YOUNG MOTHERS. HOW TO GUARD large stock of provisions, blankets, etc. AGAINST THE DISEASE.

Croup is a terror to young mothers and to post them concerning the cause, first symptoms and treatment is the object of this item. The origin of croup is a common cold. Children who are subject to it take cold very easily and croup is almost sure to follow. The first symptom is hourseness; this is soon followed by a peculiar rough cough, which is easily recognized and will never be forgotten by one who has heard it. The time to act is when the child first becomes hoarse. If Chamberlain's Cough Remedy is freely given all tendency to croup will soon disappear. Even after the croupy cough has developed it will prevent the attack. There is no danger in giving this remedy for it contains nothing injurious. For sale by Gruhler Bros., Druggists.

A Gentle Hint.

Whistler, the artist, once sat at the theater next to a lady who was going in and ont of her seat constantly, not only as soon as each act was finished, but also while the play was going on. The space between the rows of seats was very narrow, and the artist was subjected to much annoy-ance as she passed him. "Madam," he said at length in his sweetest tones, "I trust I do not incommode you by keeping

THE DISCOVERER DESCRIBES HIS KNOW The Good FIRST VISIT TO THE PLACE.

A Canoe Journey of Eight Hundred Miles With Many Hardships-The Darlog Explorer's Search Alone and the Keward

His Courage Brought. John Muir, after whom the largest glacier in the world is named, writes a paper for The Century on "The Discovery

of Glacier Bay." Mr. Muir says: My first visit to the now famous Glacier bay of Alaska was made toward the end of October, 1879, when young ice was beginning to form in the branch inlets occupled by the glaciers, and the mountains were mantled with fresh snow all the way flown from the highest peaks and ridges of the Fairweather range nearly to the level

I had speat most of the season exploring the canyon of the Stickeen river and its glaciers and a small portion of the interior region beyond the coast mountains, on the divide of some of the southerly tributaries of the Yukon and Mackenzie rivers. When got back to my headquarters Wrangel, about the beginning of October it seemed too late for new undertakings in this ley northland. The days were growing short, and winter, with its heavy orms, was drawing nigh, when avalanches would be booming down the long white slopes of the peaks, and all the land

would be buried.

But, on the other band, though this white wilderness was new to me, I was familiar with storms, had enjoyed them, knowing well that in right relations with them they are ever kindly. The main inland channels, extending in every direction along the coast, remain open all win-ter, and their shores being well forested it would be easy to keep warm in camp, while in a large canoe abundance of provisions could be carried. I determined, therefore, to go ahead as far north as possible, with or without companions, to see and learn what I could, especially with reference to future work. When I made known my plans to Mr. Young, the Wrangel missionary, he offered to go with me, and with his assistance I procured a good canoe and a crew of Indians, gathered a and on Oct. 14 set forth, eager to welcome whatever wildness might offer, so long as food and firewood should last. We made a journey more than 800 miles long, and though hardships were encountered and a few dangers the wild wonderland made compensation beyond our most extrava-

The first stages of our journey were ostly enjoyment. The weather was about half bright, and we glided along the green and yellow shores in comfort, the lovely islands passing in harmonious succession, like ideas in a fine poem. The rain did not hinder us, but when the wind was too wild we staid in camp, the Indians usually mproving such storm times in deer hunting, while I examined the rocks and Most of our camps were made in nooks that were charmingly embowered and fringed with bushes and late flowers. About noon we discovered the first of the great glaciers—the one I afterward named for Geikle, the noted Scotch geologist. Its lofty blue cliffs, looming up through the draggled skirts of the clouds, gave a tre-mendous impression of savage power, while the roar of the newborn icebergs thickened and emphasized the general roat of the storm. An hour and a half beyond the Geikie glacier we ran into a slight harbor where the shore is low, dragged the canoe beyond the reach of drifting icebergs and, much against my desire to push ahead, encamped, the guide insisting that the big ice mountain at the head of the bay could not be reached before dark, that the landing there was dangerous even in daylight, and that this was the only safe har-bor on the way to it. While camp was be ing made I strolled along the shore to examine the rocks and the fossil timber that The wife of Mr. Leonard Wells, of East abound here. All the rocks are freshly have the waves as yet worn off the surface pollsh, much less the heavy scratches and grooves and lines of glacial contour.

The next day being Sunday, the miniscount of the weather, did the Indians. slopes above the camp and to the north of it, to see what I might learn. Pushing on through rain and mud and sludgy st crossing many brown, bowlder choked torros., Druggists.

Ber Mistake.

"It was very plucky of you, ma'am, to ave set upon the burglar and so ably capared him and the burglar and the and day, my limbs had been long asleep. This day they were awake, and in the hour of trial proved that they had not lost the cunning learned on many a mountain

hours waiting for my husband. I thought peak of the high Sierra. It was him."-Liverpool Mercury. I reached a height of 1,600 feet on the ridge that bounds the second of the great glaciers on the south. All the landscape was smothered in clouds, and I began to fear that I had climbed in vain as far as wide views were concerned. But at length the clouds lifted a little, and beneath their gray fringes I saw the berg filled expanse of the bay, and the feet of the mountains that stand about it, and the imposing fronts of five of the huge glaciers, the nearest being immediately beneath me. This was my first general view of Glacier bay, a solitude of ice and snow and newborn rocks, dim, dreary, mysterious. I held the ground I had so dearly won for an hour or two, sheltering myself as best I could from the blast, while with benumbed fingers I sketched what I could see of the landscape and wrote a few lines in my notebook. Then I breasted the snow again, crossed the muffled, shifting ava-lanche tali, forded the torrents in safety and reached camp about dark, wet and weary, but rich in a notable experience
