manner in which the imprisoned American has been defended by the present Adminiswation, will hardly receive the sanction approval of Congress.

The only American spirit displayed by the President is in the British-Venezuela ques-Mon, when he says "that the established policy of this government is firmly opposed te a forcible increase by any Europeau power of its territorial possessions on this continext."

Upon the financial question, the President Upon the financial question, the President makes a demagogic effort to shift the blame on the Republican party. He admits that the revenue is deficient, but fails to offer a suggestion as to hew the receipts shall cound suggestion as to hew the receipts shall equal the expenditures. In landing the present tariffact, which was the cause of financial broubles, he fails to remember that a short Mime ago it was Grover Cleveland who said of that same act that it was "the product of perfidy and dishonor.

From the tone of the message we are inelined to the belief that Mr. Cleveland will have more trouble than before with the present "Congress on his hands."

standing and prepared to join their older and more experienced allies in future raids upon the treasury's gold reserve.

In other words, the government has paid in gold more than mino-tenths of its United States notes, and still owes thom is has paid in gold about one-half its actes given for allver purchases without oxtinguishing by such payment one dollar of tasse notes

Greenbacks Should he Retired.

"I am convinced the only thorough and practicable remady for our troubles is found in the retirement and cancellation of our United States notes, commonly called greenbacks, and the outstanding treasury notes issued by the government In payment of silver purchases under the act of 1899.

"I bolisve this could be quite readily accomplished by the exchange of these notes for United States bonds of small as well as large denominations, bearing a low rate

"They should be long term bonds, thus increasing their desirability as investmants, and because their payment could be wall postponed to a period far removed from present financial burdens and per ploxities, when with increased prosper and resources they would be more easily

To further insure the cancellation of those notes and also provide a way by which gold may be added to sur currency in lies of Mem, a feature in the plane should be an authority given to the secre pary of the pressury to dispose of the bonds abread M necessary to complete the con-templated redemption and encellation. permitting him to use the proceeds of such bouds to take up and sames any of the notes that may be in the treasury or that may be received by the government on any account. The increase of our bonded debt involved in this plan would be amply com pensabed by renewed activity and enter prise in all bindiness eircles, the restored confidence at home, the reinstated faith in our monotary strongth abread, and the stimulation of every interest and industry

Bank Tex Should be Reduced.

"The currency withdrawn by the retire ment of the United States notes and treas ary notes, amounting to probably less than \$425,000,000, might be supplied by snok gold as would be used on their retirement or by an increase in the circulation of our national banks. I shink they should be allowed to issue elreulation equal is the par value of the bonds they deposit to secure it, and that the tax on their sirou intion should be reduced to ous fourth of I per cont., which would undoubsedly most all the expense the government inours on their account. In addition, they

should be allowed to substitute ar deposit, in Hen of the bonds new required as seourity for their eizenlation, those which would be issued for the purpose of rothring the United States and treasury notes. The banks stready existing, if they desired to avail memorized of the prevision of law bans medified, sould issue obsuilation in addition to that already outstanding. "I do not overlook the fast that the

sameeilasion of the breasury notes issued under the silver purchasing act of 1896 would heave the treasury in the actual ewnership of sufficient silver, including seignlevage, to coin mearly \$178,900,000 in standard dellars. It is worthy of consideranou whether this might not, from time be time, he sonversed into dellars or frac Sional sein and slowly put inte circula-bien, as in the judgment of the seconary of the measury the nonessities of the coun tey should require.

Whatever is attempted should be entered upon fully appreciating the fact that by enreless, easy descent we have reached a dangerous depth, and that our ascent will not be accomplished without laborious oil and struggle. Weahall he wise if wary alise that we are financially ill and that our resteration to hasith may require heroic treatment and unpleasant remedies." Further on the president says:

In conclusion Mr. Cleveland urges con-

CAMPAIGN FUNDS STOLEN.

Chicago Party Managers Said to Have Minappropriated \$730,000. CHICAGO, Dec. 4. - Three quarters of a million dollars has been stolen from the

compalga fand of the Damocratic party, I for the years 1898, 1891 and the spring

of 10.5. Tais charge is made by H. C. Methonald and Alderman John Powers, and is sustained by the newly elected chairman of the county central committee, Thomas Gahan, in the statement that the funds of the past two years have not been accounted for. The money was raised for the campaign fund which resulted in the clec-tion of John P. Hopkins over George B. Swift as mayor, for the county commissioners' campaign following, for the al-dermanic campaign, for the Went contest and for the dealmage canal exception, but recently closed.

The Democratic administration of the central committee, born out of the assassination of Carter Harrison, is charged with the misuse of this money. And for this misuse no explanation is at present forthcoming from the Democratic citizens, who stand under the charge of having taken money for their own personal benefit, involving in its expenditure trips to Europe, te Wess Baden and to flat Springs, and the building of various expensive resi-dences in different parts of the city.

A DESPICABLE CRIME.

A coal operator in the western part of the state has been sentenced to pay a fine of \$500. and undergo imprisonment for three months. for cheating his employees in weighing the seal they had cut, and for which he was to pay a stipulated amount per ton.

It is well known that the lot of a soft coal miner is about as hard, if not harder, than that of any other laborer in Pennsylvania. The price per ton paid him for cutting coal is barely sufficient to keep body and soul together, without any surplus for the proverbial rainy day or for old age, when he will no longer be able to toil, and when he should, if he is ordinarily thrifty and careful of his earnings, be in possession of enough to spend the evening of life in comparative case and freedom from care for the wherewith to keep him.

The bituminous coal miner, like his brother of the anthracite region, does not earn enough to accumulate much of a surplus, so that he should at least get all he honestly earns. The crime this man in question has been found guilty of is about as despicable as any in the calendar. He was not satisfied with the legitimate profits of his business, but he must needs rob the poor to add to his gains, and used his position to further his wicked plans.

His counsel have done everything legal skill and cunning could do to save him, but his guilt was so clearly established that he was quickly convicted.

It is to be hoped his fate will have a solutary effect upon any others similarly in- Hood's Pills easy to bake,
