POWER FROM NIAGARA FALLS

Will be Transmitted to the Electrical Show in New York.

THE WONDERS OF ELECTRICITY.

The Show to be Opened To-night by Governor Morton, With a Golden Key—Dr. Chauncey M. Depew to Send a Message Around the World.

NEW YORK, May 4.—Tonight Governor Morton will open the national exposition of electrical appliances in the Industrial Arts building, in this city. Elaborate preparation has been made for this event, and it is expected that the attendance will be large and include some of the most distinguished electricians in the country. The convention is that of the National Electric Light association, to which delegates have been sent representing more than 10,000 electric lighting plants in the United States, whose aggregate capital is in excess of \$750,000,000.

The principal feature of the opening exercises will be the turning on of a current of electricity generated by the waters of the Niagara river in the great power house of the Niagara Power company, which current of electricity will be transmitted over an ordinary telegraph wire of the Western Union company. The insulation of this line is such that no considerable amount of electrical energy for power purposes can be transmitted, but by the use of the recently invented two-phase Tesla system enough energy will be transmitted to establish beyond question, it is claimed, the feasibility of long distance electric power transmission upon a commercial basis. This line will be 402 miles in length. The longest line heretofore ever established was from the Falls of the Necker to a point 110 miles distant.

The governor will use upon this occasion the gold key with which President Cleveland put in motion the wheels of industry at the World's fair. Governor Morton will also, at the declaration that the exposition is open, discharge four pieces of artillery, one stationed in the public square at San Francisco, one in Augusta, Me., one in front of the public buildings of St. Paul and the other in a public park in New Orleans. This discharge is also accomplished by a current of electricity generated in Niagara and transmitted over the telegraph lines of the Postal Telegraph and Cable company. The current of electricity, which is transmitted from Niagara, will be used in putting in motion a model of the Niagara power plant recently constructed by a syndicate at a cost of upwards of \$5,000,000. This plant consists in a tunnel 8,000 feet in length, entered by a wheel pit 150 feet in depth, at the bottom of which are mammoth turbine wheels, operating a shaft, on the top of which are immense electrical generators, with a capacity of 5,000 horse power. The total weight of the turbine wheel, shaft and generator is upwards of 100 tons.

This model, which is shown and operated with Niagara current, is a cross section view of the tunnel, wheel pit and machinery, and also shows a section of the city of Niagara Falls, with the course of the river and American falls, the islands and the Canadian frontier. Surrounding this model will be a series of telephones, which will be connected with receivers placed in Victoria Park, on the Canadian side of the Niagara river. All present, as they witness the movement of the machinery by the current of Niagara, can hear distinctly the roar of the cataract.

There will also be exhibited and operated a miniature section of the Erie canal, showing the cable way system of electrical canal boat propulsion recently adopted by the state of New York and soon to be put in operation upon the Erie canal. Floating upon this miniature canal will be a fleet of model canal boats of recent design propelled by the electric motor, which travels upon the cable by means of the electric current.

Another feature of unusual interest will be the closing of a circuit around the world, by which a cable message will be sent by Chauncey M. Depew over the cables to Lisbon, through the Mediterranean and the Suez canal and the Red sea to Aden; thence to Ceylon and Australia, returning by way of the Cape of Good Hope, the African coast, the Brazilian cable, the land line to the City of Mexico; thence by way of San Francisco to New York. This message Dr. Depew will send from a table which will be placed in a gallery of the exposition building. It will be addressed to and received by Edward D. Adams, president of the Niagara Power company, whose reply will be transmitted to and read by Dr. Depew, who will follow with a brief address upon the electric era.

The Test a Success.

NEW YORK, May 4.—The roar of the great falls of Niagara was heard in this city last night when the electric current which is to connect the thunder of the falling water with the electrical show at the Grand Central palace was turned on for the first time as a test. The test was a pronounced success. The sound of the water could be plainly heard. At the same time the power was put on, and every bit of machinery of the electrical show was put in motion for a few minutes.

A Highwayman Fatally Wounded.

WILKESBARR, Pa., May 4.—John Cawley and Thomas Reynolds, young men of Broderick, near here, were arrested on Saturday for attempted highway robbery. Cawley was jailed, but Reynolds, who is probably fatally wounded, is at home. The men are thought to be guilty of a number of highway robberies and burglaries that have been committed of late. Wednesday night they held up John Leary, who drew his revolver and shot Reynolds. Cawley then fled. Leary reported to the police, who advised him to say nothing until they could locate the highwaymen.

ANOTHER STABBING AFFRAY

A First Ward Saloon the Scene This Time.

FOUR PEOPLE WERE ATTACKED!

A Lithuanian Named Adam Paulakonis Wielded a Large Knife Savagely, But Fortunately None of the Victims Were Dangerously Injured.

Pay-day intoxicating fluid got in its work on several Poles and Lithuanians of the First ward Saturday night and especially upon one Adam Paulakonis, who made extensive use of a Jack knife in a crowd of people, but fortunately injured no one very seriously.

According to the evidence one Mike Ruskes and several friends went into the Yetkoi's saloon on East Centre street. While they stood drinking Paulakonis came into the barroom from an adjoining apartment and tried to push Ruskes from the bar. The latter protested, whereupon Paulakonis knocked the man's hat off his head, Ruskes, according to the witnesses, simply picked up his hat and quietly remarked to the bully that offending people should not be treated in that manner. William Yetkoi then walked from behind the bar and admonished Paulakonis to keep quiet, but instead of doing so Paulakonis drew the knife and slashed Yetkoi across the left shoulder blade, inflicting a painful, but not dangerous wound.

Having made the first slash Paulakonis became frenzied and made jumps in all directions with the knife, cutting Ruskes on the left arm and right wrist, and cut his shirt bosom in twain, inflicting a shallow cut about eight inches long on the chest. Mrs. Yetkoi then attempted to stop the affray and Paulakonis drew the knife across her breast, cutting the dress. The woman's corsets saved her from bodily injury. Mike Shides, a bystander, had the right arm of his coat cut open.

Constable Gibbon had been summoned in the meantime and arrived after the slash had been made at Shides. With the use of his mace and handcuffs he succeeded in overpowering the enraged man and took him to the lockup. Yesterday morning Paulakonis escaped from the lockup with five others, but in the afternoon was re-arrested at his boarding house on Peach alley by Constable Toomey. He was committed in default of \$2,000 bail and taken to Pottsville.

Kendrick House Free Lunch.

Help for the Sick.

We are pleased to announce to the people of Shenandoah that there has just been opened at No. 121 N. Main street an office of the Tait Medicine Company, of Philadelphia. Mr. Tait, the originator of seven reliable, positive cures for chronic diseases will be personally in charge, assisted by Madam Jacobs, ready and willing at all times to give information regarding the same. Many really wonderful cures have been reported from Danville, Shamokin, Pottsville and many other towns, by users of "Tait's cures." One noticeable feature about the "cures" is that one kind of medicine is not given for all diseases, but the "cure" the disease requires. Another feature is that all medicine sold is guaranteed. If after taking it according to directions, it proves not as represented return the bottles and money will be refunded, \$1 for 35 cents.

If our readers will present a copy of the Herald at No. 121 North Main street with 35 cents they will be given a large \$1 bottle of Tait's Tonic and Blood Purifier any day this week. Remember this is the advertising price and only good for a few days. No. 121 North Main street.

Whitlock's Shoe Store (Egan Block) sells the CENTURY SHOE, latest style for spring in the new shade of tan, long drawn out narrow toes, for styles. See them at \$2.00 and \$3.00.

Six Prisoners Escape.

At about 5:30 o'clock yesterday morning six prisoners escaped from the lockup by breaking the locks of the cells with pieces of iron water pipe which they tore from the fastenings in their cell. One prisoner who refused to take liberty described the methods by which the escape was accomplished. One of the men was Adam Paulakonis, who figured in the First ward stabbing affray. The others were held for drunkenness and nuisance and their names are not known, as they had not been given a hearing.

Tait's rheumatism and kidney cure will make you well. It is guaranteed. A large \$1 bottle 35c this week. No. 121 N. Main street.

Women go to Jail.

On a warrant sworn out by a neighbor Mrs. Lizzie Kitch, Mrs. Wursch Stinkavage, and Simon and William Matalavage were arrested by the police Saturday night for disturbing the peace and making themselves a common nuisance. They were all in the house of the Kitch woman, on West Lloyd street, and she was charged with maintaining an ill-governed house. They were unable to furnish \$500 bail each and went to jail this morning.
