MINE ACCIDENTS.

We take the following interesting article from the Philadelphia Times. It will prove interesting for the Heralie's many readers interested in coal mining. Speaking of the annual report of the mine inspectors, our contemporary says it again calls attention to what has been painfully impressed upon the public mind by numerous fatal mine accidents in the past, the fact that the best and most carefully considered laws for the protection and safety of the miners can easily be rendered of no effect by the carelessness of the miners themselves.

Every session of the Legislature for the past twenty years has had this subject under onelderation with the net result that curefully drawn laws esperiperalmost every ronecivable detail of the process of mining baye been enacted and are enforced by inspectors appointed because of their practical and

competent, can compel careless miners to belt obey and observe the necessary rules and presentions to insure safety. Mine roofs will fall if not sufficiently propped, and mine line of cream gloria and china silks, henrietta, were made this moraing, Geo. J. Wadlinger gas will explode if it comes in contact with a cushmeres and albatross. Also a fine assort-naked lamp. Explosive gas is as common to ment of India lineus, nainsook and plain ·mest coal fields as coal itself, and all mines and dotted swise. mave roofs to be propped or otherwise sup-

The aim of the mining laws is to compel the use of adequate supports, the proper drainage and vontibation of the mines and careful impaction of every chamber and passage for got before miners with open lamps are allowed to enter. If these requirements are fairifully faitilled mine explodens would be as rare as the law intends them to

Why do mining laws full? Because miners in their eagerness to get to work, ruch headlong into gas filled driveways and chambers in advance of the impectors; be cause those charged with the duty of placing the proper supports do their work carelessly and in violation of all sensible rules; in short, because in hers not frequently as though they considered the existence of propertie laws on the subject all the protection they require.

DEMOCRACY AND SILVER.

There is causiderable uncertainty as to the attitude of the Democrats on the financial question when they assemble in national con-Georgia, says, in speaking of the free silver every sack men, "if we can not get what we want in Chicago we will walk out and go off and form Democracy in Georgia is the big end, though hopeful. This element is showing an example which ought to shame its side in some of the other states into work.

There is a chance, says the St. Louis Democrit, that some of the threats which have been made of bolts at Chicago are bluff, designed to frighten the sound money side into submission, and are not intended to be carried out. Tillman's incendiary talk, exmost of it, is probably of this order. Yet Tillman controls the delegation of his state, and very likely can make it do his bidding. even to the extent of repudiating his party's candidate and platform if these are for gold. To be sure, the primary in the Southern States which South Carolina snatched from large one. Virginia when Calhoun went to the front in six feet below the surface. the "50s" and which she beld along to 1861, has been lost since, yet possibly if she left THE HONEST SHAKERS AND THEIR CURE the convention some of the other states of her locality would follow her as they did when she left the Union. A large part of the South is tainted with the free silver virus in 1806, as it was with the secession poison thirty-six years ago. A bolt engaged in by Georgia, the "Empire State of the South," There is another widespread form of miswould be especially dangerous.

The shopkeeper who cheats us by lying with regard to the quality of his goods, and the greer or the latter who gives us short the green of the However, their knayers in the control of the souther widespread form of misseparation of a far more dangerous and villations character.

Georgia, the "Empire State of the South," would be especially dangerous.

Probably the silver crusade in the Democracy is not quite as formidable as its champions believe or pretend, but it seems to be gaining in strength in the party in the South and West. It is immensely aided by the inactivity of the sound money side. Apathy has attacked most of the gold Democration of them, and in a stolid and despairing way they watch the silverites capture delegation after delegation, and appear to think that the disaster which awaits their party is a decree of destiny which can not be averted.

Heretofore, in fights on finance, the conservative element of the Democracy has inguaged to save the extremists from themselves, but in this instance the latter are allowed to work their own will without any sorious opposition from their party.

It has been within the power of the gold element of the Democracy has inguinal and the proposition from their party.

It has been within the power of the gold element of the Democracy has inguinal and hold fast that which is good, have put upon the market ten cent sample bottles of their isolate, or not it needs the requirements of his case. There are forms of dyspepsia which it won't help, but these are very rare. In most cases the first dose relieves all distress, and an increase of appetite at once follows. All draggies have it and the next time you are traibled with indigestion send out all the spirit of revoit among the silver men, but their opportunity for doing either is passing quickly train them.

Base Ball.

The base bull senson at Lakeside will be spened to-morrow afternion by a game between the Tammous and Tuscarors tilnes. As both teams are composed of very good material, the management thought it a vers wise move to select them. Game will be

called at 3 p. m. The management of the High school team is communicating with the management of the Shanokin High school team for a game to be played at the Tretting park next Friday afternoon.
