JEFFERSON'S RULE FOR A COIN-AGE RATIO.

"The proportion between the value "The proportion between the values of gold and silver is a MERCANTILE PROBLEM altogether. Just princi-ples will lead us to disregard the legal proposition, to inquire into the mar-ket price of gold in the several coun-tries with which we shall probably he connected in connecters, and TAKE AN AVERAGE from them."

THE READING SOLD

The Reading Hallroad Company was sold under the auctioneur's hammer yesterday, and another stage in the varied history of the great corporation was reached. Schuylkill county has much sympathy for the Real ing. The interests of one are in a great measure linked with the welfare of the other, and it is to be carmestly hoped that the action taken vesterday will eventually result in the returning of the delit-ridden company to a condition of prosperity. Even up to with in a few hours of the sale some doubted that it would take place, believing that it would be called off at the last moment.

The sale in itself is not decisive, as confirmation by the court is necessary before the final act in the forcelosure proceedings will be completed. In all probability the court will confirm the sale. but nutil the decrea is made there are those who will continue to look for some postponement or interruption of the proceedings.

As was expected there was only one bidder before the auctioneer, the representatives of the Morgan interests in New York. The future of the read is now in the bands of the reorganizers. What they will do with the Usychard, 2: Louisville, 0 property will be a development which will be awaited with a great deal of interest.

Now is the time to advertise, and the HERALD is the only modium-through whichto reach the buyers of Shenandouh. The HERALD has double the circulation of any other paper circulating in Shenandoah. Books open to all.
