The Coal Trade.
 The Anthracite coal trade keeps fairly active and the markets continue to absorb all the newly mined coal that is being forwarded from the breakers. It is understood that the quantity of coal to be mined this month has been fixed at 1,500,000 tons, but if a larger tonnage should be required the companies will produce it. The policy of the Anthracite mining and carrying companies in restricting the output of coal is to keep the supply in closer proximity to the consumption than has been the custom for several years past. By doing this they are enabled to carry on the business of coal mining at a profit instead of in wasteful competition. The prices for the standard coals are being well maintained, and some of the fancy brands are commanding a premium.

MAHANAY CITY.

A Lehigh Valley Railroad Section Boss Crushed to Death.
 MAHANAY CITY, Oct. 29.—Alfred Becker, a section boss on the Lehigh Valley railroad, was crushed and instantly killed last evening by a gondola loaded with coal crushing him. The gondola had left the truck at a switch and a wreck crew was engaged in getting it on the rails again. Becker was assisting in the work. He crawled under the car to remove an obstruction and the car was at the same time moved so that it fell upon him. His chest was crushed in, his left arm at the shoulder and right arm at the wrist broken. Becker lived at Park Place, where his wife and thirteen children survive him.

Strange that we should be selling Bull Dogs, but here is the how of it:

The newest style winter shoe is called the Bull Dog, because the toe of the shoe is supposed to look like a bull dog's nose. Now you would naturally think this a very homely shoe, but it isn't. The sole is very heavy and extension edge, the upper is calfskin, a reddish brown color. It is the most complete shoe you ever had on your foot, and is made so it will not bag out at the side. They are being sold in regular stores all over the country for \$5 and a pair, but the Factory price is
