ANOTHER SURE CURE.

PROFESSOR MARAGLIANO'S CLAIM FOR HIS TUBERCULOSIS SERUM.

Says IV Is an Unfalling Remedy For Consumption if Administered In the Early Stages of the Disease-Experiments Being Made In St. Luke's Hospital.

The unusual interest taken by physiclars and the public in the treatment of pultionary tuberculosis, or communition, at it is commonly called, will be increased by the news that serum has been discovoved which, it is declared, will prove an absolute cure for the disease in its early stages and will greatly benefit patients and arrest the progress of the disease in its advanced forms. The strum is the discovery of Professor Maragliane of Genon, Italy. A small quantity was brought to this untry, and the physicians of St. Lake's hospital began experiments with it a week

The serum is obtained from the blood of horses which have been inoculated with the tuberculosis germ in small quantities looked its existence, for no respect for the and continued under this treatment for secredness of a church edifice would have several months. Its effect is to produce in the blood of the horse some quality of re-sistance to the disease which when introsistance to the disease which when intro-duced into the human system strengthens the resiting power. The serum theory is therefore exactly opposite to the theory of vaccination, which introduces the germs of the disease Itself into the system, and by producing the disease in a mild form readers the bells investigate to its further Hourny, humber John Rocketeller, the by producing the discuss in a mild form great philomhophis, is going to give us renders the body impervious to its further salt at the contact part of the secum has Only a small quantity of the secum has

Only a small quantity of the serum has are internal mid-sad mechanistible. With oil at 10 costs a gallon and sait at 1 cent a reached this country, about 200 cubic cen-timeters in all. Part of this quantity was imported for St. Luke's hospital, but the pound the measurement of life are reduced to a mere basicable. Household expenses will be nothing at all.—New York Press. greater part was presented to the hospital by G. W. Wupperman, Professor Maragli-ano's agent. The serum as at present manfactured is expensive, each contimeter be-

ing worth about \$20. On account of the small quantity of the serum available, only two patients have been selected for the experiment at St. Luke's, and assurances have been obtained from them that they will remain in the hospital long enough to give the remedy a fair test. The claim is not made for the serum that it nots quickly. Constant treatment for at least two or three months is required to produce any definite results, and it should be continued for a year to effect

Our people are growing more and more in a complete cure.

Professor Maragliano is modest in his The meeting was also addressed by the local the habit of looking to Grahler Bros., drug-claims for his remedy. He does not expect solders' meaning to the court bluss improve meaning to the first providing in the drug line. They sell Chamber and county, held at the annual convention of Sona of a West Eulroad street early this merning. CLOSING OUT AT vanced stages several other bacilli which are classed under the general name of pyoht and transacted siness. Complaint siness. Complaint siness. Complaint siness. Complaint siness. The greater part of this stock of on which the antitubercular strum has no isld three persons lead three persons against the desired part of the stock of the stock of the antitubercular strum has no effect. The removal of the tubercle hacilit, nowever, is distinctly beneficial and leaves against the extension of the stock of the persons and the stock of the persons and the stock of the persons and the stock of the stock of

ravages of these that are left, it is urged.

The scrum is administered hypodermical ly in doses of one cubic centimeter daily In St. Luke's the injection is made in the tissues of the back. This is the part of the body recommended by Professor Marag-liano because of the thickness of the tissues there and their freedom from small blood vessels, which might be pierced by the

hypodermic syrings.

While it is too early yet to observe any decided benefit, the experiments have gone far enough to demonstrate that no ill effects follow the application of the remedy, the physicians say. There is no feverish reaction and no local irritation or inflam-mation as occurs in the administration of

some other remedies of a similar nature.

The hospital authorities do not consider For the balance of this afford a satisfactory test, as many patients For the balance of this afford a satisfactory test, as many patients month we will continue to sell with crosses and many even under the uniques of tweive o'clock, and in three the white goods, Embroideries, improved conditions of food and hydrone orientes of twelve o'clock, and in three quarters of an hour the entire place was rained by five and water. A RELIC OF ROYALTY.

Manyon's Cold Cure cures colds in the head, colds on the lungs, old colds, new colds, and obstinate colds, and all forms of grip. Stops one sling, discharges from the nesse and eyes prevents catarrh, diphtherin, ponomuola and all throat and lung troubles. These pleasant little pellets are absolutely barmless, lave mived thousands of lives and prevented cuscling. Price, 25c.

It is Found in One of the Frincipal Churches of New York.

Though few are aware of the feet, members of the congregation of old St. Paul's church gaze every Sunday at the arms of the old fashioned pulpit, which is one of the pepper box style of a century ago, are the three catrich forthers and the erow that for many generations have constituted the arms of the Prince of Wales, the heir to Britain's throne. The feathers the heir to Britain's throne. 'The feathers stand out gracefully in the center of the onk carepy. They are all carved wood, handsomely gilded, and form an attractive ornamentation to the pulpit. With these royal arms over his head, the minister who officiates in St. Paul's church on Sunday

rends the services of the American church.

It is argued that these royal arms have survived the storms of the Revolutionary days. An incensed mob traveled through New York city when independence had been declared, destroying every eign that chains they had out themselves free. Noth-ing was regarded as secred by this mob.

The royal arms were everywhere at that me—on the windows of stores whose time—on the windows of stores whose proprietors had been proud of this means of reminding the public that at one time-they had supplied his majesty's ships with salt pork or hard tack, on the lampposts at the street corners and swinging from the front porches of the old lims. Windows on which the royal symbols appeared were ruthlessly smashed by the mob, the lamp-posts were huried to the ground and the lims deprived of their signs in short order. It was a time when to be a client of royalty and many wise storckeepers escaped mob violence and saved the destroying party the trouble of smashing their signs by door the work themselve

The royal arms of England were hard to find in New York city when the mole lad completed its tour. Some five signs escaped the ruin, but not for long. They were smarked as soon as attention was called to

The relie in St. Paul's church was passed unnoticed and has survived to this day. It is certain that the mob somewhat over deterred it from laying the pulpit in rairs had the presence of the feathers and crown of Wales been pointed out.-New York

MASTODONS IN ALASKA.

Indians Fay That These Monsters Are Still Beaming About There.

The Alaska News prints a story which eight to be of interest to scientists, and hich, if it is true, will go one step farther to prove to as that wonders nover cease According to this yarn, the journal in ustion has learned of the existence of living mastodons near the bendwaters of White river, the Stick Indians positively asserting that not later than five years ago such animals had been seen by them. One of the Indians said that while hunt-

ing one day in that unknown section he came across an immense track, sunk to a depth of several inches in the moss, and from the description as the Indian marked it out to him in the sand it much resembled an elephant's track and was larger around than a barrel. Upon striking it the Indian followed up this curious trail, which to all appearances

was very fresh, and, tracking from one immense stride to the other for a distance some miles, be came in full view of his The hunter gave one look, then turned and fied as though pursued by the cvil one. These Indians, as a class, are the bravest of hunters, and, with no other weapon

of numbers, and, with no other weapon than the spear, will attack and slay the St. Elias grizzly. But the immense proportions of this new kind of game both startled and filled the hunter with greatfear, and he imagined his only safety led in swift and immediate flight.

He described it as being higger than a next trader attack with most clausers. post trader's store, with great shining yel-lowish tusks and a month large enough to

swallow him in a single lump.
If such an animal is now in existence, it inhabits a section of very high shiftede and one but marriy visited by human beings, and these only Indians. What lends that at no very distant period the Yukon country was inhabited by these animals, and bundreds of their massive skeletors were found strewn along the creeks.

DIED.
