meets with more discouragement in seeking a cure than those afflicted with all other allments. After exhausting the skill of the best physicians, and inhaling various mixtures, paying out large sums for doctoral fees and medicines, he finds himself either as bad off as at first or a great deal worse.

The cause of this is easily explained. The cause of this is easily explained. The disease is in the blood, and only a real blood remedy can possibly have any effect upon it. The doctors being unable, with their stereotyped remedies of potash and mercury, to cure diseases of the blood, direct their efforts toward treating the symptoms of the disease, and ignoring its the symptoms of the disease, and ignoring its constitution. cause. The inhaling of various aprays, and use of washes, etc., is but a superficial and temperary treatm and cannot possibly effect a cure.

MRS. JOSEPHINE POLIULA

Mrs. Josephine Polhill, of Due West, S. C., was for years a sufferer from this distressing complaint, and has earned by experience its tortures.

"For years I was the victim of the doctors, and took numerous medicines claiming to cure the disease, but in-stead of being benefitted my condi-tion grew worse steadily.

"The trouble became so deep-scated

that I was entirely deaf in one ear. It is difficult to describe my condition, but some idea of the ravages of the disease can be obtained when I state that all the inside of my nose, includ-ing part of the bone sloughed off. It can be readily understood how offensive all this was, and how unbearable my condition became. When the disease had gone this far the physician gave me up as incurable, and told me I would never be any better. Reading of many similar cases being cured by S. S. S., I determined to try it as a last resort. I soon discovered that all my former treatment

had been wrong, as the disease was in the blood, and only a blood remedy could cure it. I began to improve at once, and grew better as I continued to take S. S. S. It seemed to get at the seat of the disease, and after a few weeks' treatment I was entirely cured, and for more than seven years have had no sign of the disease."
