FINANCE AND TRADE.

Dun's Review Optimistic, While Brad-streets' is Pessimistic in Tone. New York, March 27.—R. G. Dun & Co.'s weekly review of trade says: Yory varely have the markets sustained

such surprises as they have received of lote with so little loss. Foreign conditions and London alarms, the colinpse of the iron ore combination, the destructive floods in the Mississippi valley and the decision of the supreme court against rallway associations have been used to the utmost, but not even in railroad stocks has the result been important. Were all associations of railroads to cease it would yet be in the power of aspitul controlling im-portant lines to stop serious rate our-ting if it chose. With confidence that better times and larger business are day to throw away good investments, and the very fact that prices of pro-ducts are low is reparted as a guntantee against much further docline In all industries, also, the number of mills and shops and hands at work

gradually increases. The grain markets have lost without reason the gain they made without reason the previous week. Wheat supplics are running out, but holody be-lieves that there is coming a famine before June, when the harvesting of southern wheat will begin.

Bradstreets' review says: While the week is not without favorable features. unfavorable influences have been more numerous. Leading money markets show no improvement. Mercantile collections continue slow as heretofore, and the volume of funds offered is in excess of demands for discounts. The tendency of investments to im-prove has temporarily disappeared under the influence of the supreme court "anti-trans" decision, which ap-parently threatens garangements for the maintenance of railway rates, as well as railway trades union activity, so far as it may affect interstate com-merce. The Undency of prices is downward.
