# ONE IN EVERY FOUR.

## One Person in Every Pour Suffers From - 11es.

About one purson in every four suffers from some form of sector diseases. The most common and annoying is itching piles, indicated by warmth, alight moisture and intense. uncontrollable liching in the parts affected.

The usual treatment has been some simple | TRADE SHOWS AN IMPROVEMENT olutional or salve which sometimes give temporary relief, but nothing like a perms. According to Bradstreets' Review. uent cure can be expected from such super-Relal trentment:

The only permanent cure for itshing piles yet discovered is the Pyramid File Cure, not only for itching piles, but for every other form of piles, blind, bleeding or protruding. The first application gives instant relief and the continued use for a short time causes a permanent removal of the lumors or the small parasites which cause the intense. itching and disconfort of itching piles.

Many physicians for a long time supposed that the remarkable rollef adjuded by the Pyramid Pilo Cure was because it was supposed to contain eccaine, opium, or similar drugs, but such is not the case. A recent in wheat, flour, coal, coffse and lard, unreful analysis of the remedy showed it to be absolutely free from any vocaine, oplum, or in fack any poissnous, informats drugs whatever. Bold by dramistral 50 cents per package.

# FINANCE AND TRADE.

Commercial Agencies.

While R. G. Dun & Co. Declare That the Markets Are Still Walting-A Mundred Thousand More Workers. New York, April 3 .-- Bradstreets' re-

view of trade says: The course of general trade shows some improvement, notwithstanding an almost complete stoppage of business in the south Mis-similpi valley by washouts, overflows and floods. The condition of country roadways throughout central western states and the northwest is such as to still further delay collections and check demand from interior merchants. Another drop is recorded in prices of beasemor pig fron and steel billets, and netivity and higher prices for wool and for woolens, corn, oats, sugar and petroleum. A heavy movement of for-tilizers is reported in the South Atlantic states. Interest in lumber and shingles has increased on the northwost Paine const. and Galveston is exporting

1 vial, Personal letters to Prof. Manyon, 1805 Arch street, Philadelphia, Pa., answered, with free medical advice for any disease. eatthe to Europe. The most favorable trade reports are from the porthwest-ern spring wheat states.

Special reports to Bradstreets' from 60 citics, with reference to revival in activity in industrial lines, indicate

probably 100,000 in excess of the num-ber employed in November last. The

shops, clothing, machinery, engines, car-riages, furniture, iron, steel, glass and shipbuilding. Depression still exists muong some branches of the woolen goods industry, in coal mining and cot-

The markst for products has been variable and uncertain. Wheat closes shown on board the commander in chicf, No. 307 On asking what that meant, he answered: 'Why, to leave off action. Leave off action,' he repeated, and then added with a shrug, 'Now, d—n me if I do!' He also observed, I believe, to Captain Foley: 'You know, Foley, I have only one eye. I have a right to be blind sometimes,' and then, with an archness peculiar to his character, putting the glass to his blind eye, he exclaimed, 'I really do not see the signal.'" Professor Laughton, whose authority on t cont lower than last week, and the May option has declined 2 cents, and western receipts for the week have been 2.781.557 bushels, against 1.961.205 last year, while the Atlantic exports, flour included, have been 2.185.278 bushels, against 1.280.013 last year. The movement of corn continues so large as to materially affect the demand for wheat. The iron and steel industry has been staggered, so to spenk, by the decision of the supreme court affecting rail-roads, since it is apprehended that pur-

chases not only of rails, but of cars, boomotives and bridge materials may be affected. The demand for rails is still considerable, and one order is pending for 10,000 tons for Japan, but the reduction in Mesabi ore, with the want of arreement as yet among pro-ducers of hard ores, tends to encour-age the bellef in lower prices for fin-

A FURTHER RISE PROBABLE.

Many Villages Have Been Cut Off From World for Several Days-Floads in the Northwest Will Cause Great Damage.

Memphis, April 2 .- The flood situation has once more become acute from a point above Austin. Miss., as far down as the first break at Perthshire, Miss. and a croyness in this line of levees would not be surprising. The pressure on the levee is brought about by the

waters of the Et. Francis basin, are here congested between the levees in front of Helena. The waters are now so high in the SL

DEATH.

thing is under water. In many villages no communication with the outside no communication with the outside world has been had for several days. The threatened rise at Cairo is now a certainty. The Mississippi above Cairo and the Cumberland and Tennessee rivers will send a great flood into the already filled St. Francis basin, and from Cairo to Memphis it is foured that the deluge will mark a high water figure that will be without precedent. At Memphis the river is stoadily fail-ing, the gauge reading 36.3 feet, a fall of one-tenth of a foot since Thurnday. of one-tenth of a foot since Thursday. The calls for assistance from numerous points along the river are becoming more and more frequent,

A dispatch just received from Green-ville says: While the town is still on an bland and the water threatens to flood the greater part of it, there is enough dry land left to accommodate everybody. Late Thursday aight, al-though work was pushed along the protection lever with great vigor, the prospect that this bulwark against the flood would be completed in time to be effective were very slim. By morning the embankment had been thrown up sufficiently high to protect more than half the city, and work is still pro-The situation at East St. Louis is

more threatening. The water has al-ready made its way about 20 feet in on the banks, and the predicted rise will move it up to the railroad tracks, from which point it will easily find its way over the bland, as the country slopes downward from that point.

The Northwest Floods.

St. Paul, April 5.-The river last night reached 17 feet, three feet above the danger line, and the unoccupied flats on the west side of the river are flooded, while the water has surrounded many small shantles on the upper thats Reports from all over this state and from the Red river valley and the val-ley of the Jim river, in South Dakota,

RUBBER TEETH.

## They Are Light and Cost but Little to Manufacture

A novel thing in teeth has been invented which places artificial massicators within the reach of the masses. The inventor and manufacturer is a well known New York dentist, who says that his new process will enable him to make complete sets of excellent teeth for \$1.50 or \$2 and still renp s

lent tooth for \$1.00 or \$2 and still ranp a satisfactory profit. The invention is a departure from any thing heretofoxe introduced in modern dentistry. It consists of a complete artifi-dal set of teech made entirely of rabber, the base or plate and the teeth being formed integrally. In their manufacture an ingenious method is employed which not only insures a correct formation of the artificial mastleators, whereby they are made to closely resumble nature sproduct, but also simplifies the process of what is nalled "setting the teeth m." A hollow, flexible metallle matrix, which both in ternally and externally repristness the formation of the natural iteds, is made, which, when filled with rubber and vil-canized, produces a perfectly formed act of canhaid, produces a perfectly formed set of tooth.

One of the greatest obstacles in over come was the shading of the rubber tech, but this the inventor has accomplished by means of a chemical blenching process of shadher but less satisfactory process of shading is by the mixture of different col-

From a smithry standpoint the rubber teeth are perfect, there being no joints, as in all other forms of artificial dentures, in which the accretions of the mouth may find lodgment. A more expensive form of the new teeth is that in which the mastithe new neuron is that in which the masti-cating surfaces are capped with a continu-ous metallic facing, which readers the denture practically indestructible and un-breakable. Gold, silver, platterin and aluminian have been used for making the growing. Our of the groutest advantages of rubber tools as the groutest advantages Sold by droggins, or such post pullon receipt of price of rubber (set), as de irom their chorpness, is their extreme lightness. They weigh less than half as much as any other form
