WILKESBARRE TALK.

About the Little Enemies to Back- Two Murderers Die in the Electrical ache-What Home People Think About It.

Mr. John Gibbon is a citizen of Wilkes-barre. Our representative found him at his place of residence, No. 237 Hazis street. Mr. Gibbon has been for a long time the victim of bad back und kidney traubles, following conversation held with him will interest many: "Mr. Gibbon," said our representative,

"Third everything I heard of for which merit was claimed." Here Mr. Gibbon The electrocution of William Haas named comerous well-know kidney medicines, and one in particular, a high priced control to the armature on the control that he had taken and the control that he had taken and the control to the control that he had taken and the control to the

Pillar."

"Just as so many others have. I saw them advertised and got a lox at the drug store of Tuck & Co. I thought they might belp me a little, and to my surprise, they proved the best thing I had ever taken. Nothing has helped me like Donn's Kidney Pills, and I may not been slow to tell my fronds of their genuine merit."

We will de electrocuted on the day set would de electrocuted on the day set for the execution, was secured.

To prevent any possibility of the armature being tampered with an extra guard was placed in the dynamo room. Haus and Wiley, the condomned men, passed their last day in reading and religious devotions. The death

'How did your disorder effect you ?" pain in the back at times was beyond descrip-tion. I most emphatically endorse Doan's Kidney Pills and shall do all I can to reommend them to others, for they are worthy of 4t, and above all, I shall use them myself." Donn's Kidney Pills are for sale all dealers, price no cents, mailed by Fester-Millarn Co., Baffalo, N. Y. Sole agents for the U.S.

OHIO ELECTROCUTIONS.

Chair in That State.

DOTH MEN MET DEATH BRAVELY.

Old Youth Convicted of Criminal Assault and Murder-The Second Was a Wim Murderer.

Columbus, O., April 21,-The first "Yest all described at longer works of the old execution room for special exercisions."

"I the description of the control of electrocutions in Ohio took place shortly after michight in the annex of the

article that he had taken many bottles of, all electrocution dynamo the electrocution had to be postponed, and Govern How did you come to take Donn's Kidney Bushnell fixed the date so that Hans would be electrocated on the day set

and religious devotions. The death warrants were read to them during

Hans was the first to be electrocuted. He was strapped in the chair at 12:27. When he was brought into the electrocution room he closely scrutinized the chair, and was pushed into it. The current was turned on for a period of two seconds three times in succession. As soon as the body of Haas was taken out of the chair Wiley was brought inchair. Both electrocutions were eminently successful. The condemned men were nervy to the last.

men were nervy to the last.

The crime for which Hans was electrocuted was the criminal assault and marvelous facility in using the pen. murder of Mrs. Brader, the only oc-cupant of the house except himself. After cutting her throat with a razor, to cover up the crime Haas set fire to the house and first

after Haas committed the above crime.

MAN AND THE APE.

Dr. Spencer Trotter Illustrates Points of Resemblance and Dissimilarity. Dr. Spencer Trotter of Swarthmore col-

by Spencer Protect of Swarmhote Scholer delivered an illustrated lecture at the Academy of Natural Sciences on "Animal Characteristics of Man."

"In his brain structure," said Dr. Trotwhole, and the other mammallan orders.

And as Huxley says, 'The difference in weight of brain between the highest and lowest man is far greater, both relatively

and absolutely, than between the lowest man and highest ape."" Spenking of heredity, Dr. Trotter said it was a well known fact that the young of all animals tend to revert to the ancestral type. "Thus," said he, "In a group of closely allied species of birds—where some of the species are solidly colored and some have mottled plumage and spotted breasts -the young of the solidly colored species thrushes, especially in the case of our rob-in. So among mammals the young of

ian features, which, though shocking to the famil parent, point nevertheless toward Robinson has also shown that not only the plane - furrow, but also the great mobility ing a preliensible foot. The disproportion-

BOGUS AUTOGRAPHS.

Are Treasured by Many a Collector. How He Was Detected. One of the most expert of autograph "Exactly as you describe hidney complaint the morning. Hans, who was only 19 to your advertising, and my suffering with the morning. Hans, who was only 19 a time enjoyed a success only equaled by years of age, had been indifferent to that of the notorious Vmin Lucas, the lack at times was layout descripto that of the notorious Vrsin Lucas, the Frenchman who victimized M. Charles, the savant, to the tune of 40,000 francs. The name of this rogue was Robert Spring. and though the actual scene of his rescal-

> that of American history, and especially of Washingtonians. Spring was a Londoner born, and served his time as indentured clerk to a servener of that city. This person, Furnical by name, was a noted bibliophile, and it was

in New York's collection that are infected by his fabrications, and that, too, in the

department now held in highest esteem

to the house and fied.

William Wiley murdered his wife on the West Erde of Cincinnati 20 dovs than the stump of a quili pen, a bottle of than the stump of a quill pen, a bottle of brown lok and a few blank leaves taken from the volumes on his shelves. Encour aged by his success, he overdid the thing, and Baltimgre became undestrable as a place of residence. So he removed to Phil-adelphia in the early fifties (1854 it is supposed) and opened another curtosity store on South street, west of Broad, and for a number of years did well and even pros-

Collecting autographs was a fashion of "In his brain structure," said Dr. Trotter, "man is evidently closely allied with
the apo, and the difference between man
and any of the higher apos in this respect
is not so great as that which exists between the apos and monkeys, taken—as a
whole, and the other mammalian orders.
And as Huxley says, "The difference in
additions the application of the signatures of the signers, in fact, and supplied them to the trade ad libitum. He not only had much knowledge of out of the way Revolutionary history, but also was an excellent parrator, and is his convivial moments a most amusing companion. His frauds must have been almost numberless, for he did a large business, both in New York and Canada, selling to a lawyer in this city 60 bogus letters from Benedict Arnold and his wife Margaret, while he supplied the err Kanucks with many Franklins and Wash

Suspicion was first aroused against him are often conspicuously mottled and spot-ted. This is notably the case with the ton family, was sold at nuction in Phila-delphia. Many of the books had in them the autograph of Washington, and these many species exhibit markings quite dif-ferent from their parents. Lion only, for example, show spets which ally them to the leopards and their kind.

Hany of the books had in them the autograph of Washington, and these naturally brought high prices. But it was thought extremely odd, to say the least, when in one of the volumes a letter of becards and their kind.

'The human infant presents many sime Spring's was found, worded ambiguously and offering his survices to some one in and offering his sarvices to some one inthe foul parent, point nevertheless toward
a common anihropoid ancestry. Among
the most remarkable of these evanescent
characteristics are the plantar furrows or
creases on the sole of the foot in newborn
bables, which, as Dr. Louis Rubinson has
pointed out, present a striking similarity
to the crasses on the foot of the ape. Dr.
Rubinson has also shown that not only the
multiproper for the opinion that Spring's
multiproper for the opinion that Spring's
multiproper for the opinion that Spring's
multipropens industry in description had been omniverous industry in deception had been employed in giving a fletitious value to volumes with the autographs. However,

ing a predensible foot. The disproportion at strength of grip in the hand of a young baby and the tendency which it shows to cling to things further support the theory of an arboreal life on the part of man's archaic ancestor.

If you have been detected at all. Wary and the country are a positive burnen in the second strength of the part of the country and the second strength of the part of the country and the second strength of the part of the country and the second strength of the second streng archaic ancestor.

"The young ape is quite human in the relative features of the head and face, while the adult degenerates toward a more bestial character. At the same time the adult man approaches more toward a lower type in certain features, norably in the greater development of the brows and facilal elements, and his semile observes are a Morris. To a friend he declared greater development of the brows and fa-ctal elements, and his senile characters are the idedly simin."

To a friend he declared that he had sold to a country clergyman an autograph of Pontius Pilate for \$3, and an autograph of rolling in the described with much humor the trem-thile his ancestors may have had advan-hilling eagerness with which this modern hilling eagerness with which this modern had a dvan-

In conclusion, Dr. Trotter said that, while his ancestors may have had advantages in protection from the weather by a hairy covering and a more keen sense of hearing and smell, man had unquestioned advantages in the development of his mental faculties and the skill of his hand.—Philadelphia Press.

The described was in the described with which this modern billing eagerness with which this modern Dr. Primrose secured his fancled prize.

His actual detection was due to a Dr. Davis of Philadelphia, to whom he had seld a number of the signatures of the signars. By accident one of them became wet and faded out. It was then found that it had not been written with a brownish pigment which this modern Dr. Primrose secured his fancled prize.

Philadelphia Press. A Novel Barometer.

It has taken a clever Frenchman to discover a kind of barometer which may be safely called unique. An English journal says that it is nothing more nor less than the figure of a general made of ginger-bread. He buys one every year and takes it home and hangs it by a string on a nall. Gingerbread, as every one knows, is castly affected by changes in the atmosphere. The slightest moisture renders it soft, while in dry weather it grows hard. THE TIMES is the most extensively.

The slightest moisture renders it soft, while in dry weather it grows hard and tough.

Every morning on going out the Frenchman and public instance is in the interest of public integrity, besteat government and prosperous industry, and it knows no party or personal allegiance in treating public issues. It the broadest and best asses a family and general newspaper.

THE TIMES

In the most extensively, the interest of the independence is all collection, and add the interest of public integrity, besteat government and public instances in the chemical state. The suppose of the handwriting of the handw
