that it is his duty as the chief executive to delay no longer in taking ac-

dition of affairs in Cuba.

These representations, however, have not been sufficient to induce hasty ac-tion. The president is moving stead ily, and with all speed that safety and sound judgment warrant in the collection of facts touching the conditions that exist upon the island today. To this end Mr. Calheun is now in Cuba, officially on another mission, but also charged with the observation of the conditions that prevail. When he has reported to the president, and the latter has gathered what he regards as a sufficient store of information, based on facts that cannot be questioned, he will be ready either to take himself or these facts warrant. Meanwhile he has under earnest consideration the best means of affording relief to Amerloans suffering as a result of the condi-

tions on the island.
