The Delaware dam bill signed by the governor authorizes the damming of

any stream in the state, under certain resirbutions, for the purpose of securing power. It is designed primarily to au-thorize the damming of the Delaware river at Trenton, and was pushed by the Trenton board of trade. The bill provides for the acquiring of land for raceways by condemnation proceed-ings. In the bill it is stipulated that a fishway must be constructed, to permit the figh to pass up and down the river. Any company erecting a dam

must not pollute any water, and the rights of any company are limited, so as not to restrain municipalities frem taking water from the river for drinking purposes, and it is further pro-vided that no dam company shall have any right to proceed against any municipality for damages because of taking for drinking purposes any water that has been dammed. A number of Trenton men stand ready to build a dam just as soon as consent can be obtained from the Pennaylvania legislature. A bill conveying the same privileges as the one signed yesterday

is pending in Pennsylvania. It is es-timated that the contemplated dam will produce about 12,000 horse power. In disapproving the bill to prohibit the managers of the soldiers' home from deducting a part of the pension money of the inmates the governor should contribute a portion of the cost of their maintenance, and that where the lumate had relatives outside who needed all their pension money he hop-ed the managers would make a rule that such inmate need not contribute anything to the home. This will un-doubtedly be done, and will meet the objections to the present practice of retaining a portion of all pensions.
