The news is that when the time arrives for a wholesale distribution of the places, Judge Day, the new First Assistant Secretary. will be the man to deal them out. Secretary Sherman has some friends whom he wishes appointed, but when these are provided for he will do as did Secretary Gresham-allow some one else to handle that part of the of official patronage. It is highly important that a bill to prevent indiscriminate immigrationsuch a measure as was passed at the last session of Congress and vetoed by Grover Cleveland-should be fixed upon the statute books at the earliest possible moment, but we are told that this time it would lead to a long de-bate from the Democratic side of the Senate and could not be pushed to a vote in months. It provides that hereafter no newspaper shall be carried in the mails unless the names of all the stockholders are placed conspicuously at the head of the first editorial pages, with the number of shares they own. The bill also provides that the name of the writer of each editorial shall be appended thereto. His object in introducing the bill, he says, is to make it possible for editorial writers to get full credit and be responsible for what they write. This law is in force in France and other countries, and is found to work well. He also says he wishes to force writers to express their honest envietions, which is quite another cure for scrofula, salt rhenm, humors, convictions, which is quite another matter, and will be a hardship on the Democratic editors of Republican newspapers and vice versa. Leffler had started the elevator from the ground floor, with the five men and bags of cement upon it. When Mezzanine floor was reached the elevator almost came to a stand-still. In a moment or two R shot up again, until it had nearly reached the third floor, when there was a snap and the elevator dropped to the engine room, which is 20 feet below the level of the street. Then the heavy steel cables fell with a crash on the defenseless heads of the men imprisoned in the elevator, all of whom were more or less injured by the force of the fall. There was some difficulty in getting the injured men out of the wrecked elevator, owing to the fact that the weight of the heavy cables rested on top of their bodies.
