A PEOPLE OF FEW WORDS.

'Let your speech be yea, yea, and nay, usy," says the Good Rock, "for whosonver is more than these cometh of evil." The Shakers shide by the spirit of this rule. Their words are few, simple, sincere and direct. They waste no energy in idle talk; they use it in thinking and doing. And leaving Milwaukee July 10, 11, and 12, 1897, whatever they do they do with their might, only, except that by depositing ticket They are content with nothing short of the sessence and principle of the things they investigate. They take pairs and are patient. And thus the doors of many strange fruths open to them. In this way they discovered what may almost be called the unity of disease. A venerable Stuker says of it: "It is said that one man's most is another man's poison. That is but half the truth. Any man's meat is any man's poison, under certain conditions. If the grain never got further than the hopper we should never have bread; and if bread never got further than the stomach we should never have strength. When the stomach is torpid, helpless and inflamed the food lies in it and rots. This fermen tation produces polsons which may, and often do, disorder every other organ and function of the body. This is indigestion or dyspepsia, with many symptoms and disguises. Cire it and you will cure ninetenths of your complaints." These words were attered many years ago. Since then they have found a remedy, now known as the Shaker Digostive cordial. It is made from medicinal plants cultivated by them. It is a food and digests other foods. Taken while cating it resis the stemach and th neurishes the system. The pain and distresses of dyspepsia disappear before it. It prevents fermentation and soon restores from Hembay say that from 600 to full power to the digestion. It succeeds in 1,000 rictors were killed during the rethe worst cases. It is worthy the name of the people whose name it bears. Any druggist will sell you a trial bottle for ten cents.
