## THE KLONDIKE DISTRICT

A Circular Which Gives General Information Concerning It.

DIFFERENT ROUTES DESCRIBED.

It Is Estimated That Fifty Thousand People Will Make the Trip Next opposite. Spring-The Vatue of Pay Streaks. Petroleum Lake Discovered.

Seattle, Aug. L-I. A. Nadeau, the general agent of the Northern Pacific, has prepared a circular concerning the food that your body needs, you will have a Klondike district. The circular is full good appetite. Not before. of information, and is in part as fol-

There are two established routes into the Klondike country. One is via the ocean to St. Michael's, thence via and may give you headache, dizziness steamer up the Yukon to Dawson City. The mouth of the Yukon river is 6 weakness, mental depression, stomacische, miles from St. Michael's, and the disance from St. Michael's to Klondike 2,000 miles. The facilities on the Yukon consist of two stern-wheel steamers belonging to the Alaska Comercial company, and the steamers P. Weare, J. J. Healy, of the North American Transportation and Trading the system of the poisons of indige company, and a third boat, the C. H. makes you strong, fat and healthy. Hamilton, of the latter company, which is expected to be ready in a couple of the liver, but on the undigested food in the ateamers having a draught of more internal organs.

The other route, and the one which will be principally traveled, is from Dyea, over the trail via Chilcoot Pass to Lake Linderman, thence through the chain of lakes which you will see on any Alaska map into Lewis river and down the Yukon to the Klondike. The route via Dyea is by steamer from Seattle running direct to Dyea, where they pack over Chilcoot to Lake Linderman, at which place they build boats usually 22 to 24 feet long and 414 to 5 feet wide, which are taken through the lakes, while the provisions have to be packed over two short portages, one one and a half miles and one of about three-quarters of a mile, while the boat is taken through the small streams. For sale at l'ovinsky's drug store, 28 East Contre street The distance from Seattle to Janeau is 899 miles, Juneau to Dyea 96 miles,

and Dyea to Dawson City 604 miles.
"The Klondike is variously estimated at from 170 to 200 miles south of Circle City, and is located in Canadian territory. It is a stream about 140 miles in length, running in a general westerly direction, and the gold hearing creeks where the richest finds have been made full of new life and vigor, take No-To-Hac. run into the Klondike from a general the wonder-worker that makes weak mer

Bay No-To-Bae from eight to thirty feet from the surface, and is reached by sinking a shaft from two to three feet wide and six feet long down to the pay streak. Sinking this shaft and working the pay streak are made difficult from the fact that from made difficult from the fact that from the surface to the deepest depth that has yet been reached the ground is perpetually frozen and a process of firing in order to thaw out the ground is employed. A brush and wood fire is built in the bottom of the shaft, which, burning all night, thaws out the ground from eight to fourteen inches. The gravel is shoveled out during the day, and the operation is repeated until the desired depth is renched. The average progress in the shaft is from eight to fourteen inches per day. When the pay streak is reached they drift under the ground, which does not have to be supported by timbers on account of its being perpetually frozen. The fire, in thawing out the pay streak, generates a very obnoxious gas, which, after the fire has burned out, must be expelled before work can be done. This is accomplished by the use of bellows, fans and other devices. A machine, however, is being manufactured in Seattle that it is expected will expel these gases speedily.
