Armitt's Workers.

THE STRIKERS MOST ORDERLY

They Still Claim That the Outlook is Most Encouraging for Their Cause. Rain Interferes With the Proposed Marches on the Working Miners.

Pittsburg, Aug. 11 .- A crists is fast approaching in the miners' movement against the New York and Cleveland Gas Coal company. The next few day should determine whether or not the strikers' object will be realized. The strikers still maintain excellent order and claim that the outlook is most en suraging for them.

While yesterday's work is not viewed in a disappointing light by the camp ers at Turtle Creek, Sanday Creek and Plum Creek, yet yesterday's happenings were not of the most encouraging sort. They had to contend with their first spell of bad weather. A heavy rain drenched the camps and prevented the marchers from carrying out their regular program. At Plum Creek the rain and continued absence of a band kept the men in their quarters with the result that little, if any, mis slonary work was undertaken.

The storm also had the effect of pre-

venting the march to the Spring Hill mines, between Wilmerding and Wall Station, which are owned by Alexander Dempster. The only march of the day nd; E. W. Peabody, third; time, was made by the 150 men at Camp Determination, who left camp shortly after 5 o'clock, and marching close to the Oak Hill tipples spent two hours in the vicinity of the miners' homes. There was not even ordinary excitement attached to the invasion along Thompson's Run. A summary of the much the same as they were on Monto have made a further break in the strikers' ranks at Turtle Creek and Sandy Creek. The Plum Creek mine was running considerable coni yester day, and the number of men reported at work equals that of Tuesday.

The failure to hold a meeting at Camp Isolation was another disappoint ing feature of the day, and the men are loudly clamoring for the presence of the officials. The batch of Italians that struck camp on Monday are expected to do much good among their fellow countrymen at work in the Plum Creek mine, but active labors were withheld until today, when it will be positively known whether or not the men pro-
