SHENANDOAH will be well repreSented at the state firemen's convention at Wilkesbarre this week. On
Threeder the day of the cared the Thursday, the day of the parade, the station, Philadelphia. Columbia Hose Company will be in line, fully uniformed, and it goes without saying that they will present a fine appearance. The citizens of Shenandoah are proud of their volunteer fire department. Associated together for a public purpose these men serve the interest of the town without pecuniary reward, and they do it as cheerfully in winter's blasts as in the heat of summer. They should be supported in every undertaking, as it is a matter of public interest.

The Miners Organizing.

Prior to and since the termination of the miners' strike in the Lehigh region, President Fahey, of the United Mine Workers of America, has been very successful in organizing the men in that region. He has placed a branch of the corganization in almost every town and hamlet in that section of the anthracite region, and is continuing the good work. The men now realize that to properly combat the operators with a view to a settlement of the grievances it is necessary to organize. It is not a matter of choice, but necessity drives them tolt. In noother way can they expect to secure redress. This was the universal sentiment of the several thousands of employes of the Lehigh fessed to having turned the queen's and Wilkesbarre Coal Company, who met at Wilkesbarre on Saturday to discuss the best means of remedying discussions and the best means of the the grievances they claim exist.

From the newspaper reports it is learned that the meeting throughout was characterized by good order and sound judgment, and the absence of vituperative denunciation and ranting appeal on the part of the speakers was agreeably conspicuous. In a clear and incisive way the grievances of the men were stated, one speaker saying, "To-day we are scattered and what is the result? We are now obliged to beg from the company what we should demand as a right. If we were properly organized this would not be, and we should organize and form a union, for in union there is strength. There is no use trying to get justice the way things are now. Decause at present were we to declare a strike there would be three men to take the place of every one that quit work.

The grievances specifically stated at the meeting are charged against the Lehigh Valley and Wilkesbarre Coal Company, but they probably exist at most of the collieries in that of coal for which they receive no company pays only \$1 per keg for and now I honortly believe the Pyramid to powder for which the miners are be the only cormin care for piles

AN APPALLING CALAMITY.

Pifteen to Twenty Thousand People Drowned in China.

Tacoma, Wash., Oct. 5.—The steamer Victoria brings news of the most disastrous floods that have visited China for many years. Sixty villages near Tung Chow, containing over \$0,000 in-habitants, have been destroyed by floods, and the people drowned or forced to fice. There is no means of finding out how many thousands have been drowned, but the number is estimated by Chinese authorities at 15,

The flooded district is within 12 miles of Pekin, the capital of China. As a rule Chinese officials make very little tir when a calamity like this happens, at the proximity of the disaster has esulted in its being brought to the attention of the emperor, who has or-dered that all possible relief be given. Survivors from the village nearest Pekin have been allowed such shelter as they can find on the city walls, but thousands are without protection against the rain, which continues to

"Leading dry goods merchants of New York say that there has been nothing like the present boom in that line since 1892, and that the year bids fair to break all records in the amount of sales. Excherant as such expressions might ordinarily seem, they cannot be deemed extravagant in view of the fact that reports of New York trade unions show an increase since one year age of \$4 per cent in the number of men at work, and a similar increase among men in like position throughout the country would exceed 340,000, while every week adds many establishments to the active list. There need be no question as to the stability of a prosperity based upon the agricultural regources of the country and a steadily increasing employment of its labor."
