TRIBESTIEN UNCONQUERED.

Massing in large Numbers to Resist the British Advance.

Eimia, Oct. 37.—It is estimated that the tribonner have massed 20,000 men at Sampagian Paga, where they are busy making rifle pits in the Sangary and strengthening their defenses. It is generally believed, however, that it will be possible to turn the position by either flank, and, though hard fighting either Bank, and, though hard fighting is possibly in store, it is hoped that the pass will be carried without great ef-

Meanwhile it is bad news that the tribesmen have begun to operate on the British lines of communication. The fear is that, finding this the most successful means of delaying the British advance, they will detach still larger bodies to attack the British convoys and cut up the escerts. Last evening the tribesmen harassed the British camp near Khangabur by a

constant well directed fire for several hours. Nearly 30 non-commissioned flicers and men were slightly wounded. A picturesque but unfortunate inci-dent occurred on the Shinwari side of the Samana range. A party of Gurk-has sent out under Lieutenant Millard. had crept up close to a large body of the enemy. Just at this moment, through some mistake, magnesium star shells were fired from the British camp and revealed the whole situation, en-abling the enemy to escape unburt.

Few people are born entirely free from blood taint. This is often very alight or remote, and sometimes may not develop at all in one generation, but breaks out in a serious disease later.

Cancer, the most dreadful of all disease, is often the result of some blood taint inherited from generations back. It often appears as a mere mole of insignificant pimple, which later develops into an alarming condition. No one knows but that he may be subject to an inherited impurity in the blood, nor can he tell whether or not this may some day crop out in the form of destructive cancer. It is, therefore, important that any little sore or scratch, which does not readily heal, be given prompt attentions. "For ten years it has bothered me more or less, being very had at times."
