LAUER'S LAGER AND

LAURIER'S MISSION.

Canada's Premier Comes With a Message of Peace.

TO SETTLE ALL CONTROVERSIES

The Canadians Attach Little Importance to the Bering Sea Dispute, and Will Endeavor to Settle More Especially the Alten Labor Difficulty.

Washington, Nov. 9 .- The authoritles here have been advised that the arrival today of Sir Wilfred Laurier, premier of Canada; Sir Louis Davies, minister of marine in the Laurier cabinet, and other officials of the Domin-ion is to have an important bearing not only on the Bering sea settlement, but on all the pending questions which have been sources of international com-plication between the United States and Canada, namely, the passage of allen laborers to and from Canada, the North Atlantic fisheries question, the presence of many Americans in the Klondike territory belonging to Canada and in the mining regions of British Columbia, the fisheries trouble along the great lakes, the bonding privilege granted Canadian ratiroads, the controversy over rights in the Fraser river, British Columbia, and in the Puget sound, and also the question of a reciprocity arrangement between the United States and Canada.

There is direct and definite information that Sir Wilfred comes prepared to take up all the questions, and if possible include them in one general set-tlement whereby the constant friction they have engendered may be overcome. On some of these subjects he
will confer with President McKinley,
and on at least one of them, that relating to allen laborers crossing the
border, he will suggest such mutual
modifications of present restrictions as
in his opinion will be of material advantage to the thousands of Americans
now in the Klondike and British Conow in the Klondike and British Co-lumbian mining country, and at the same time will be of advantage to Canada along the eastern border.

The essential features of Sir Wilfred's

mission were communicated to the of-ficials here by a person folly advised of the premier's plans, and it can be said that the suggestion that the decks be cleared of existing disputes between Canada and the United States met with the favor of the administration. While the Bering sea settlement occasioned the visit, the Canadian authorities attach much less importance to it than they do to the other questions mentioned. Little doubt, it is said, is felt by the Canadians that an amicable adjustment of the scaling question can he made. Among the plans suggested is that of an indemnity large enough to permit Canada to buy out the sealers and retire them from business.
With this done the United States,
Japan, Great Britain and Canada
would be together in a suppression of petagic scaling. Under the Canadian premier's direc-

On the other hand, it is claimed by the Canadians hand, it is claimed by the Canadians that about 5.00e Americans are in the Klondike territory belonging to Canada, and that fully 19.000 American contract laborers are working in the mines of British Columbia. The United States immigration laws, it is asserted, are administered with harshness along the Canadian border, and are a dally source of irritation. Sir Wilfred is prepared of irritation. Sir Wilfred is prepared to offer a repeal of Canadian restric-tions in the Kleedike and other re-gions if the administration of the American law is made more lenient.

On the matter of reciprocity, the gen-eral purpose of the negotiations will be to give the United States the benefit of the minimum clause of the present Canadian law in exchange for the 20 per cent reduction allowed under the Dingley law. The desire of Sir Wilfred and his associates will be to confine the arrangement to a few important articles, allowing time to deyelop its usefulness and extend its

The world ad-The world admires leaders. We may disagree with their opinions and oppose their causes, but we are invariably attracted by the peculiar strength of people who lead life's army, What constitutes leadership? It is not alone learning or character. It is nerv-

ons strength. It is the perfect physical, mental and moral health that comes from pure blood, the essence of life. Many bright people have more ambition than and die. It is not the dazzling meteors but the steady planets that move the world. Dr. GREENE'S
