In Great Britain 7,000,000 depositors have upward of \$550,000,000 in savings accumulated during 35 years, and in ten years fewer than 10,000 Hawaiian depositors saved nearly \$1,000,000. These vast accumulations have been made with the least possible loss to the governments, which guarantee their payment, and with a minimum of cost to the millions of depositors. In reply to the ques He believes that 50 per cent of the paid Shenandoah and Vicinity Headquarrens:-Hotel Francy, Shenandoah up and unimpaired capital of the bank should be the limit of the note houes, and that a cash reserve should be held

I approve of the plan adopted by the American Bankers' association at Baltimore, in October, 1894, commonly called the Baltimore plant. All bank notes should be redeemable at the com-mercial centers of the country, and also et their own counters. Perhaps an ex-ception should be made of the Pacific coast, on account of distance.

gency I would allow an extra issue equal to 25 per cent of the bank's capi-tal, conditioned upon the payment of a tax, at the rate of 5 per cent per aunum, to the government as long as the excess of notes remains outstanding. "I would allow any bank having a paid up capital of not less than \$1,000,-000 to establish branches in its own

state, and any bank having a capital of \$5,000,000 or more to establish branches in any part of the United States. I would allow notes to be issued only by the parent bank, although they might be issued to and paid out by the branch banks in the usual course of business.

J. C. Berry, one of the best known citizens of Spencer, Mo., testifies that he cured himself of the worst kind of piles by using a few boxes of DeWitt's Witch Hazel Salve. He had been troubled with piles for over thirty years and had used many different kinds of so-called cures; but DeWitt's was the one that did the work and he will verify this statement if any one wishes to write him.
