WHILE it is true that the average jury will award damages against a nunicipality or corporate body, in nost cases without justification, there is no good reason why the borough should not defend its position in court rather than settle the claims by the payment of exorbitant figures. Mahanov City has figured in two or three suits for damages during the recent term of court, and speaking upon this subject the Mahanoy City Record truthfully says: "In Mrs. Marley's case there were fair reasons for a suit for damages and the deelaton is, therefore, no surprise, but it does not mean that the borough made any mistake in refusing to award damages without suit. In PAYTON'S BIG two-thirds of the claims of damages against the polity contributory segligence upon the part of the claimant of a flagrant character can be shown, as in the Boyle case recently won by the borough, and the fact that the borough will firmly protent its rights, has a tendency to prewent people sustaining some trifling mishap from presenting unreasonable claims.

The early summer months are usually the ones in which the imports are heaviest and August generally sees a stock of 400,000 tons on hand. This year, however, importations had been so heavy that when the Dingley law went into effect the stock on hand was 800,000 tons. As the annual consumption is about 1,300,000 tons there was about six months supply on hand at that time and importations ceased until now, when the surplus has been reduced to nearly the normal quantity and customs receipts will soon begin to show a large increase and it is expected that the revenues of the government will soon equal the expenditures. The opponents of the bill ave loudly proclaimed that rates of nty had been increased so much as Ladies' tickets for Monday evening hibitory, citing sugar in parbut the present increase in effectually disproves their
