About eight o'clock in the evening the smell of burning rags had become so strong that Mr. Foley decided to make a more thorough investigation. In the yard be found a heap of ashes which had been thrown against the rear part of the oil house con nected with the store. The ashes appeared cold and they emitted no smoke, but Mr. Foley concluded to turn them over. As he took the first shovel full there was a blaze from the heap. A little more digging over-turned a bundle of burning rags. Somebody living in the row had evidently thrown hot ashes where the fire was found instead of walking about twenty feet further to dump them into a bin provided for the purpose.
