Whether in the form of pill powder or liquid, the doctor's prescription for blood diseases is always the same—mercury or potash. These drugs bottle up the poison and dry it up in the system, but they also dry up the marrow in the bones at the same time.

The diversion occasioned by taking up the Teller bond resolution has left the senate in a somewhat disorgan-ized and unsettled condition, and with

The army and the legislative appropriation bills are already on the cal-endar, and the consideration of the agricultural bill has been completed by the committee, so that it will be re ported today. The probabilities are that the army bill will be the first of these measures to receive consideration, though there is some disposition to displace it with the legislative bill. Senator Allison, chairman of the committee on appropriations, said this morning propriation bills considered in advance of other measures, and if he adheres t this determination the week may be largely taken up with them. So far as can now be seen there are few features in the bills already reported calculated to arouse discussion. is a feeling in certain quarters that the army bill should be amended by a provision for the increase of the army and if such a change should be at tempted it would give rise to a very

spirited debate.

The census bill also will be pressed for consideration during the wee Senator Carter, chairman of the census committee, said today that he was very hopeful of securing its passage in the near future. The debate upon the civil service will be resumed when this bill is taken up, and the bill will be so amended as to give the control of the census bureau to the secretary of the

In view of all the possibilities for debate and delay involved in these various measures, it seems quite improbable that the Hawaiian treaty will receive much attention, at least in executive session during the week. Still Senator Davis, chairman of the committee on foreign relations, announ-It to be his purpose to move an execu-tive session for the consideration of the treaty today, but it is possible that he may be influenced by pressure from senators who have other measures requiring immediate attention to post-pone this motion for a few days. There is a growing impression that the friends of the treaty feel that their safest course is in delay. They have made a very thorough canvass of the senate and have not been able to discover where they can get more than 58 votes whereas to ratify the treaty they will

have to have 60. Senator Pettigrew's determination to discuss the Hawalian question in open session will have a tendency to take the direction of the ratification resolu-tion out of the hands of the foreign relations committee, and it may prove to be the opening wedge to a discussion of the whole subject in open session of the senate. His resolution de clares it to be contrary to the tradi-tions of this country to acquire any territory so situated as to require a navy to protect it. This is a basis broad enough for the discussion of the whole subject. Mr. Pettigrew will deal with Mr. Dole's visit, and will undertake to show that that gentleman was never elected president, that the constitution of the present government of Hawaii was never submitted to the people of that country, and that in fact the whole government is irregular, Grapes Overhang Two Miles of Carria Drives.
