ASSAULTS BY STRIKERS

On Men Who Would Not Join Them in the March to Lattimer.

TEN ARMED WITH REVOLVERS.

A West Hazelton Constable Declares He Saw the Armed Strikers Fire at the Crowd—The Sheriff of Carbon County on the Stand.

West Hazelton, Pa., Feb. 26.—There was no session of the Lattimer case yesterday morning, owing to the illness of A. W. Washburn, juror No. 12. The juror was much improved at noon, and when court was called at 2 o'clock he was able to take his place in the jury box and the case was resumed.

The first witness, George Denek, said he was working on the dump at West Hazelton when the strikers came up and ordered him to march with them. Hereafter, they cut his head open with a stone and kicked him in the ribs, mistaking him for a miner. He was in the hospital for four days.

John Shulerberger was forced with two other men to join the strikers, and marched with them to Harwood, where he heard them agree to go to Lattimer.

Ernoch Howell saw the strikers enter West Hazelton on Sept. 3. They were armed with clubs, were noisy and threatening, and chased several men into the brush. Otto Reicheing, a 16-year-old boy at Crystal Ridge, was pulled along by several strikers, who said if he did not march with them they would knock his brains out. William Graham, who was driving to Yorktown, gave a man whom he did not know a ride, and the strikers struck the man in the mouth with a club.

Rev. C. H. Hurst, pastor of St. Paul's Reformed church at West Hazelton, saw the strikers in that town on Sept. 10. They were armed with clubs and stones, and seemed very determined. John J. Philby was sure he saw a striker with a double-barreled gun at West Hazelton on Sept. 19, and so was M. J. Oswald.

Edward Meier, a constable at West Hazelton, said that on Sept. 10 the strikers threatened to take him with them to Lattimer. Ten of them were armed with revolvers and he saw them fire three shots at the crowd. The sheriff met them there and told them to go home, saying the ten days which the Parde company had taken to consider the advisability of granting the strikers' demands were not up yet, and they should wait. The strikers were much excited, and one of them picked up a stone to throw at the sheriff.

The star witness of the day was Milton Sellzer, the sheriff of Carbon county. He said he was called out by the coal companies to protect their property, and on Sept. 5 had a consultation with Sheriff Martin, at Hazelton, where they had proclamations printed and posted in conspicuous places around the coal companies' various works throughout the region.

"Last spring I did not feel in my usual health; felt tired in the morning as when I retired; had no energy nor ambition to go about a day's work; no appetite with which to sustain strength and energy. In this condition I worked from week to week, thinking that after a while matters would right themselves and I would feel like myself again. But to the contrary, I grew weaker. Knowing that Dr. Greene's Nervura was not a patent medicine, but a medicine put up from a prescription discovered by the doctor in his private practice, I resolved to try it. The first bottle helped me so much that I purchased another one, and even a third bottle, when, to my great joy, I found myself as well as ever I was in my life; and furthermore, have remained so."

THOUSANDS ARE LIKE HIM.

Prominent Member of the Legislature Cured by Dr. Greene's Nervura.

Representative Crouch Made a Well Man by Using Dr. Greene's Nervura. Editor J. C. Gere Gives the Result of His Investigation of This Remarkable Cure in the Daily Gazette. Spring is the Time to Be Cured.

HON. CHAS. S. CROUCH, REPRESENTATIVE IN THE MASSACHUSETTS LEGISLATURE.

The editorial columns of the Northampton (Mass.) Daily Gazette give the particulars of the remarkable cure by Dr. Greene's Nervura blood and nerve remedy, of Hon. Charles S. Crouch, Northampton's ablest and best known statesman and Representative in the Massachusetts Legislature.

Editor J. C. Gere, of this leading newspaper, personally investigated the facts of this wonderful cure, and his wide-read editorial states the details of the cure exactly as they occurred, giving Hon. Mr. Crouch's own words.

Following is the editorial in full: Learning that a great cure had been effected in the case of Representative Charles S. Crouch, of Northampton, Mass., by Dr. Greene's Nervura blood and nerve remedy, a reporter took occasion to call on Mr. Crouch and talk with him about it, and among the thousands of testimonials given to this world-renowned medicine, none will be more widely read or give greater weight than this one coming from so noted a man as Representative Crouch.

Hon. Mr. Crouch said: "Last spring I did not feel in my usual health; felt tired in the morning as when I retired; had no energy nor ambition to go about a day's work; no appetite with which to sustain strength and energy. In this condition I worked from week to week, thinking that after a while matters would right themselves and I would feel like myself again. But to the contrary, I grew weaker. Knowing that Dr. Greene's Nervura was not a patent medicine, but a medicine put up from a prescription discovered by the doctor in his private practice, I resolved to try it. The first bottle helped me so much that I purchased another one, and even a third bottle, when, to my great joy, I found myself as well as ever I was in my life; and furthermore, have remained so."

It is not a patent medicine, but the prescription of the most successful specialist in curing disease, Dr. Greene, of 35 West 14th St., New York City. He has the largest practice in the world, and this grand medical discovery is the result of his vast experience. It is a fact, no longer to be doubted, that this remedy cures that it makes those who use it strong and well—that it is the most and most certain cure for disease in all the world, and the very best spring medicine possible to take.

FINANCE AND TRADE.

Industrial Production Continues Larger Than Ever.

MARVELOUS FEBRUARY BUSINESS

The Transactions Larger Than in the Second Month of Any Previous Year. The Sudden Rise in Wheat—Foreign Demand For the Cereal Continues.

New York, Feb. 26.—R. G. Dun & Co.'s weekly review of trade says: Foreign possibilities have much affected speculation and caused hesitation in some large business operations, possibly accounting in part for a check in the rapid advance of wheat, but industrial production continues larger than ever, a few more works being added to the active list, with a decrease in the number of hands on strike, and renewed evidence that the volume of business is larger than in February of any previous year. Nor is there any symptom of a seasonal craze based on rising prices. The legitimate export and domestic demand presses closer to the capacity of works, and though there is no slight advance in any line, and in all narrowness of profit is a matter of complaint, new business for this dull season is unprecedented.

Wheat continued its progress upward until 10:05, when it reached on Monday, but declined 2 1/2 cents later, as if there were fear that Spain would somehow stop British vessels from taking wheat across the straits. Any speculation based on foreign possibilities deserved little notice, but the price had advanced about 10 cents since Chicago speculators last took occasion to shake off wheat followers, and the opportunity for excitement was waiting. There is no abatement of foreign demand. Atlantic exports were 1,968,814 bushels, flour included as wheat, for the week, against 1,326,444 last year, and Pacific exports were 1,576,376, against 126,494 last year, and in view of current excitement these figures are more important than the aggregate for four weeks, 10,496,912 bushels, against 6,588,415 last year from Atlantic ports, and 4,053,925, against 1,911,246 from Pacific ports.

It is not the season for much improvement in textile manufacturing, but the cotton branch has gained by the closing of the strike in one Fall River mill and the addition of some works at the south. The woolen manufacturer meets many cancellations, especially in goods sold early under definite price, but is doing more than ever at this season, though new business in the higher grades of worsteds and woolsens is not particularly encouraging.

The iron manufacture has more demand for products and slightly better prices for domestic manufacture, but the steel branch has gained by the closing of the strike in one Fall River mill and the addition of some works at the south. The woolen manufacturer meets many cancellations, especially in goods sold early under definite price, but is doing more than ever at this season, though new business in the higher grades of worsteds and woolsens is not particularly encouraging.

And Now a Day Arrest.

Chicago, Feb. 26.—One of the largest trusts formed in years has been organized by Chicago men, under the name of the American Hay Company. Although the incorporation is under Michigan laws, headquarters will be in Chicago. The organization, when completed, will include more than 100 of the largest buyers and shippers of hay in the states of Illinois, Indiana, Ohio and Michigan. The capital stock is \$2,000,000. A tract of land near Buffalo is to be purchased as a site for its immense warehouses.

Children and adults tormented by burns, scalds, injuries, or rashes of skin diseases may secure instant relief by using DeWitt's Witch Hazel Salve. It is the great skin remedy. C. H. Hagenbuch.

Old Lady Killed by Stroke. Savannah, Ga., Feb. 26.—The Plant system and Atlantic Coast line Florida Special, westbound, train between St. Augustine and New York was brought to a sudden standstill on a burning trestle near Waycross, 100 miles south of Savannah, by a warped rail yesterday afternoon. The sudden shock caused the death of Mrs. Frank D. Hildreth, of Yorkville, N. C., 62 years of age, and threw the remaining passengers into a panic, but all escaped with only slight bruises. The cars were consumed.

Motherhood is a woman's brightest crown. It is a woman's glory to be strong, healthy and vigorous. Her best insurance is to have any physical weakness affecting the delicate, special organism which is involved in motherhood. To insure the complete health and normal stability of this most important structure, is the purpose of Dr. Hodge's Favorite Prescription. It gives tone and vitality to the entire nervous system, and strength and vigor to the organs of maternity. It is a safe, reliable, and comparatively easy and painless.
