HUNT FOR WARSHIPS.

Uncle Sam Has Perfected No Arrangements For Purchase.

PLENTY AMMUNITION TO BE HAD.

The Government Can Quickly Secure Powder and Other War Material in Case of Necessity-Arranging For Guns to Arm Half a Million Men.

Washington, March 10.-The feature of yesterday's events was the promptitude with which the senate passed the house bill carrying the appropriation of \$50,000,000 for the national defense, and the haste with which it was put through the formal proceedings, engressed and signed by the president. While the matter has been considered it can be stated that the fund has not yet been aches and fevers and cures habitual allotted among the various branches of the government service. Each of and second class palace and tourist sleeping these had prepared roughly and tenta- cars to points in Missouri, Arkansas, Texas, duced, pleasing to the taste and ac- tively an estimate of the funds it could dispose of to advantage, but upon look-Ing over the ground the president concluded that it would be well perhaps to avoid making the allotment until the necessity became apparent.

The reason back of this is that the warships cannot even be guessed at with any approximation to accuracy just now. As the ships are to be first choice in the steps for defenses until their cost is ascertained it is not possible to divide the remainder of the appropriation among the other branche of the military and naval services. The secretary of the navy is making every effort to secure from our naval at-taches and diplomatic officers abroad all information obtainable respecting the number of ships building, their price and other data. This does not necessarily interfere with the execution of the plans confided to Captain bladder need doctoring.

Brownson, who salled for Southampton There is comfort in the yesterday, but rather promises to as-sist him materially in making speed

with his inquiries.

Up to this moment not only has the United States government bought no biadder and every part of the urinary warships, but it has not even secured passage. It corrects inability to hold urine an option on one. There are many and scalding pain in passing it, or bad effects applications coming to the department following use of liquor, wine or beer, and from persons and firms who desire to sell ships to our government, but in most of these cases either the craft offered is not suitable for naval needs or the date of possible completion is so distant that it cannot be regarded as worthy of purchase to meet an emergency.

There is less difficulty experienced in

securing tenders of war material, such as shot and shell and powder, and the navy department has almost assured itself of an abundant supply of certain kinds of smokeless powder abroad at short notice. The officials of the department are in daily correspondence by mail and telegraph with agents of ammunition houses, and besides are this offer. domestic powder makers for enlarging their plants to meet an emergency. The representatives of the armor mak ing firms are in consultation with the department steadily, generally relative to the supply of gun forgings and such material for use in the gunshops here and at Watervilet, but the question of armor is receiving little attention, as the armor makers report that they can not undertake by any known agency to turn out such armor as would be required for a modern battleship in les than seven months, for the reason that tempering and face hardening cannot hastened without destroying the

value of the armor.

The statement was made at the navy department today that the report of the Maine court of inquiry probably would come to the department some time next eek. It did not appear, however, that this statement was founded upon any direct report from the court, but was rather an estimate based upon the progress so far made as revealed by the change of methods on the part of the court. It is not expected that Lieutenant Commander Marix, the fude advocate of the court, will leave th court until it has completed its labors as it is the custom for the judge adcocate to assist in the preparation of

the final report of the court.

Admiral Sicard has been authorized to enlist suitable men for the navy at Key West if he can find the material. He reported that he had received some applications from machinists and seamen, and was immediately given power to take the men. The department is still striving vigorously to secure ma chinists, especially men who know how to run stationary engines. These men can be quickly taught how to run marine engines, and require little other training to make them valuable aboard

Official reports indicate that the autonomy scheme projected at Porto Rico has been put into successful operation. This is interesting mainly beject and the plan which it is now sought to put in play in Cuba.

The war department is arranging to secure a large supply of the most modern rifles, sufficient in time of emer-gency to arm a force of \$00,000 men The need of these modern guns has long been apparent, but congress has not shown a disposition to supply any reserve of rifles for use by a volunteer force in time of emergency. Now, how ever, an adequate supply of the most effective rifles will be among the first uses to which the war department will put its share of the defense fund. Like attention is being given to supplies of powder, cartridges, etc., for the army Those in authority say orders can be filled without delay, and that about only branch of ordnance on which the facilities are not fully up to an emergency demand are those for heavy

fortification guns. Much conjecture has been indulged in touching the visit paid yesterday to the White House by the British ambas The Washington Post this

morning says on this point: "Queen Victoria has, through Si-Julian Pauncefote, conveyed to President McKinley her gratification at the wise and conservative course which he has thus far pursued in relation to the Cuban and Spanish situation. She also expressed to him her thorough syppathy with the efforts put forth by United States to relieve suffering humanity in Cuba, with the hope that these endeavors may be conducted to a

successful conclusion without war." The Greatest Discovery Yet.

The Greatest Discovery Yet.

W. M. Repine, editor Tiskilwa, Ill., "Chief." says: "We won't keep house without Dr. King's New Discovery fer Consumption, Coughs and Colds. Experimented with many others, but never got the true remedy until we used Dr. King's New Discovery. No other remedy can take its place in our home, as in it we have a certain and sure cure for Coughs, Celds. Whooping Cough, etc." It is idle to experiment with other remedies, even if they are urged on you as just as good as Dr. King's New Discovery. They are not as good, because this remedy has a record of cures and besides is guaranteed. It never fails to satisfy. Trial bottles free at A. Wasley's drug store.
