BRADLEY'S DEATH. The Jury Leaves the Cause of Death in Doubt.

Deputy Coroner Manley and a jury held an inquest last night in the case of Joseph Bradley, whose manipled remains were picked up on the Philadelphia and Reading railroad at three o'clock Sunday morning. A verdict was rendered and the jury leaves the cause of death in doubt.

The first witness examined was John J. Stevens, conductor of the train. He testified that the body was found face downward after the train had massed over it. The brakeman picked up a medicine bottle bearing the label of a Mahanoy City drug store and some money was found in the pockets of the de-censed. The witness did not know anything

of the deceased's watch. He did not see it. Isaac Bachman, of Frackville, testified that he was the engineer of the train and that he had been in the employ of the  $\Gamma \& R$ . Rail-way Company for twenty years. He first saw the body of the victim when his train was about ten yards distant. He could not stop the train. It had no air connections, Three cars went over the body. He saw no one in the vicinity at the time. Mr. Bachman knew nothing about the victim's watch James Smith, of Mahanoy Plane, said he was the fireman of the train. He was on the tank at the time the train went over the body. He found the body face dowaward. One leg was cut off and the other hanging sy shreds. The train had run about two cars ngths over the body. One of the logs was

found close to the bridge. Nobody was in the vicinity at the time. The body second to be cold. The witness knew nothing of a Happenings Throughout the Country Michael J. ### The Coal Trade.

The anthracite coal trade continues to sufer from the mildness of the season and the absence of demand for coal. The winter is now regarded as practically over and has left large unsold stock on hand. So far from keeping the output down in February, it veloped the most perfect and successful sys-tem of cure through correspondence. #### Big Coal Division.

A rumer is to the effect that all the coal pranches of the Lehigh Valley railroad, says the American, will be centralized under the control of Superintendent Mitchell, with headquarters at Wilkesharre. This will include the present Wyoming division and what is knows as the Mahanoy and Harleton division. It is contended that little skill is necessary to manage the affairs of the Mahanoy division with the Pottsville and Shamokin branches, as those divisions are practically managed now by lesser officials and the main care of Superintendent Mitchell would be to

develop them and make them important tributaries to the main line. With the putting into effect of this policy, a death blow would be struck at Dolano. With With Superintendent Blakslee out of office the power that has made Delano and held to-
