lief convinced them they were right, and so they laid a return of the pain to a return of the complaint, when in fact, the disease was there all the time. Backache is not an aching of the back, but an aching of the kidneys, is ief is secured. Doan's Kidney Pills are perfect in their work and permanent in their cure. A lacknobe gives way at once because the kidneys resume their normal functions and there is nothing to ache. There is nothing so and to combut as the evidence of our senses, and yet all who believe us on the subject of backache are glad they did because of the cure.

Mr. Auguste Swegler, of 14 East Coal street, miner, found in the old Quaker remedy just as certain a cure for a bad back as many other Shenandoah citizens have found, and he does not hesitate to recommend it strongly. He says:-"I used Dan's Kidney Pills and found them most reliable and satisfactory in curing my lame back. I was troubled for a long time, and about four months ago when I learned of this remedy which was said to be so good for buckache and kidney trouble I procured a box at Kirlin's pharmacy. My back at that time hurt me when lifting or stooping and if I sat down and attempted to rise or move quickly sharp twinges of pain went directly through it. When on my feet there was a steady aching in my loins. I do not have those troubles now, and I have not felt them since using Doan's Kidney Pills. I can endorse them as a good reliable preparation for

the kidneys." Doan's Kidney Pills for sale by all dealers. Price 50 cents. Mailed by Foster-Milburn Co., Buffalo, N. Y. Sole agents for the U. S. Remember the name Donn's and take no

Besides these were Shy Ting, perfect in the work at that, before permanent secretary of the Chinese legation at Washington, accompanied by Hon Soo also of the legation. A reception com mittee from the Union League club and U. S. Grant Post 337, G. A. R., met General Woodford at Quarantine and accompanied him to this city. General Woodford declined to be interviewed. Mr. Sickles, when informed that cable dispatches had stated that the train on which the members of the legation had come from Madrid to Paris had been attacked by a mob and that stones had been thrown at the party, said:

"Well, some things were thrown at the train, but the demonstration was not of a serfous character. A few windows in one of the cars next to the party were broken, but none of us were injured. While at Madrid we were treated with the utmost courtesy."
Mr. W. G. Cannon, of Denver, Colo.,

who had been traveling abroad, said he was forced to return to this country, and he could not continue through Spain during the present state of affairs. In Paris, Mr. Cannon said, the feeling is most bitterly anti-American. Every person who is thought to be an American is elbowed off the sidewalks, jostled by the crowds, and everything ssible done to show the antipathy of the French. Street cars will not stop to take on American passengers, rates of exchange in money are exorbitant, and small purchases are not encouraged by many of the shopkeepers except at figures three or four times the actual

Bishop John L. Spalding, of Peoria. Ills., stated that the feeling of the French toward the Americans was in-tensely hostile. He said that he understood that one of the reasons for this was that eight-tenths of the public debt of Spain was held by the French people, and that the latter country

It is believed the McCulloch will first go to Mirs bay, to await there final instructions for Admiral Dewey as to how he is to deal with the Philippine Islands.

According to reports current here the American admiral will insist, by force if necessary, upon the Spaniards accepting at least a temporary pro-tectorate of the United States. It is believed here that if the Spaniards do not meet the views of Washington in the matter the American admiral will take prompt steps to administer the islands for the United States as soon as he receives the necessary troops and supplies from San Francisco

RUSHED INTO DANGER

Two of Our War Vessels Narrowly Escape Destruction.

LURED INTO AN AMBUSCADE.

For Over Half an Hour the Vicksburg and the Cutter Morrill Were Under the Fire of the Guns of the Santa Clara Water Batteries.

Key West, May 3.—Only poor marks-manship on the part of the Spanish gunners saved the Vicksburg and the cutter Morrill from destruction of Havana Saturday. For over half an hour they were under the fire of the guns of the Santa Clara water batter-les, but both escaped without material injury, although shrapnel shells from eight inch guns exploded all shout

into the ambuscade. The rate worked like a charm. The Vicksburg and the Morrili, in the heat of the chuse and In their contempt for Spanish gunnery, walked straight into the trap that had been set for them. Had the Spaniards possessed their souls in patience but five minutes longer not even their had gun practice would have saved our ships, and today two more of our ven-sels would lie at the bottom within two lengths of the ill starred Maine. Friday evening the Vicksburg and

the Morrill, cruising to the west of Morro Castle, were fired upon by the big guns of the Cojimar batteries. Two shots were fired at the Vicksburg and one at the Morrill. Both fell short, and both vessels, without returning the fire, steamed out of the range. But on Saturday the Spanlards had better luck. The schooner they had sent out ran off to the eastward, hugging the shore. About three miles east of the entrance of the harbor she came over on the port tack. A light haze fringed the horizon, and she was not discov-ered until three miles off the shore.

The schooner instantly put about and ran for Morro Castle before the wind. In doing so she would, accord-ing to the well cherished plot, lead the two American warships directly under the guns of the Santa Clara batteries These works are a short mile west of Morro, and are a part of the defenses of the harbor. There are two batteries one of which mounts modern ten inch and 12 inch Krupp guns behind a six foot stone parapet. In front of which are 20 feet of earthwork and a belting of railroad iron. This battery is sidered the most formidable of Havana's defenses, except Morro Castle. The Morril and Vicksburg were about six miles from the schooner when the chase began. They steamed after her at full speed, the Morrill leading until within a mile and a half of the Santa

Clara batteries. Commander Smith, of the Vicksburg, was the first to realize the danger into which the reckless pur-suit had led them. He concluded it was time to haul off, and sent a shot across the bow of the schooner. The Spanish skipper instantly brought his vessel about, but while she was still rolling in the trough of the sea, with ner salls flapping, an eight inch shrapnel shell came hurling through the air from the water battery, a mile half away. It passed over the Morrill and exploded less than 50 feet on the port quarter. Two more shots followed In quick succession, both shrapnel.

The crews of both ships were at their

guns. Lieutenant Craig obtained per mission to return the fire. At the first During 1888 THE TIMES will not only maintain the high standard of excellence it reached the past year, but will steadfastly endeavor to excel its own best record, and will not swerve from its set purpose to make

In the meantime Captain Smith also put his helm to port, and was none ton soon, for as the Morrill stood off a solid eight inch shot grazed her starboard quarter and kicked up tons of water as it struck a wave 100 yards beyond. Captain Smith said afterward that this was undoubtedly an eight the armor piercing projectile, and that it would have passed through the Mor-rill's boilers had be not changed her

course in the nick of time.

All the guns of the water battery were now at work. One of them cut the Jacob's ladder of the Vicksburg adrift, and another carried away a por-tion of the rigging. As the Morrill and the Vicksburg steamed away their aft guns were used, but only a few shots were fired.

The Spaniards continued to fire shot and shell for 20 minutes, but the shots were ineffective. Some of them were so wild that they aroused the American "jackies" to jeers. The Spanlards only ceased firing when the Morrill and Vicksburg were completely out of range. The officers of both the Morrill and

Vicksburg frankly admit their own recklessness and the narrow escape of their vessels from destruction.
