TALK OF INTERVENTION.

France, Russia and Germany Fear That Our Government May Retain the Philippines.

London, May 13.-Inquiries in quarters where official opinion is closely followed suggest that the obvious uneasiness of France, Russia and Germany over the continuance of the has been communicated to official quarters here.

Austria has special dynastic reasons for desiring peace. France, Russia and Germany find ground for alarm test America should be led so far on the path of conquest that American public

opinion should demand the retention of the Philippines, if not other Spanish possessions. It is understood that representations have been made to the government here from some European capitals. Paris among them, in favor of joint intervention, nominally in the interests of peace, but really, as it appears in high quarters here, to forestall any attempt at American acquisitions utside of America's home sphere. Any such attempt to coerce America out of her legitimate sphere of spoil, as France, Russia and Germany co-

erced Japan, will find no support here. The feeling in official as well as in general quarters tends rather to that of Mr. Coell Rhodes, who expresses himself very forcibly on England's true polley and advises America to stick to what she gets. Mr. Rhodes says: "Never mind what other people say, let her stick to the Philippines. Let

The Pennsylvania Railroad Company an England give her moral support. That sounces that, for the parade of the German will keep the other powers quiet. Let Catholic State Convention at Scranton, Pa , Wednesday, May 25, it will soll excursion tickets from points on its line within a radius America in return keep an open door in the Philippines, giving England, and any other power who treats her as well of one hundred miles to Scranton and return fiscally as England does, the same at rate of single fare for the round trip. freedom in the Philippine market as America herself will enjoy."
