WAITING FOR SCHLEY. The Government Wants a Report . From the Commodore BEFORE TAKING DEFINITE ACTION

Meantime the Army of Invasion Will Be Held in Readiness to Move at Any Moment-Holland Wants to Attack Cervera With His Submarine Boat.

Washington, May 28,-The military situation as at present determined upon by those in authority is to make no forward movement of troops either upon Forto Rico or Cuba unail full and definite information is received as to the location of the Spanish squadron and its possibilities as a factor in the 2777997999999999999999999999999999 aggressive moves of Spain. That being the positive determination there is no present purpose to hurry forward the troops now at the several points of concentration, but the interval prior to an aggressive forward movement will be employed in seasoning the men. Steps have been taken to secure early information as to whether Admiral Cervera's squadron is inside Santiago harbor, and whether the American squadron has such advantage of oppo-sition outside the harbor as to make the escape of the Spaniards practically impossible.

For the last few days army circles have shared public bellef that the Spanish ships were trapped in Santi-age harbor, and that has given an impetus to arrangements by which large bodies of troops at Chickamauga and elsewhere might be moved forward rapidly to Tampa for embarkation. The presence of 30 or more transports in Florida waters added to the conviction that a movement on a large scale was about to occur. All this has been going on with the understanding that Admiral Cervera's career as a possible menace in the rear of our troops had been cut off by his being securely held within Santiago harbor, but in the absence of positive information on this point, together with the certainty that he can be held inside the harbor, there is no purpose whatever on the part of the war department to make an ag-gressive forward movement on Cuba or Porto Rico. This was stated today in the most positive manner and from an authoritative source.

Unless the navy department succoeds in securing some direct and official information respecting the Span-ish and the American fleets within the pext 24 hours through the ald of the West Indian cables it will resort to the use of dispatch boats. It can be again affirmed on the highest authority, and notwithstanding all rumors to the con-trary, that at the close of the day the department had nothing more than a belief, founded on unofficial advices. that the Spanish squadron was lying in Santiago harbor, and no news as to Commodore Schley's whereabouts. However, the great majority of the officials of the navy department enter-tain no doubt that Cervera is within Santiago harbor, and they have succeeded in impressing this belief upon the president and the members of the cabinet.

It was announced last night that Holland, the inventor of the submarine boat of that name, was expected here and they will talk with Mr. Holland over the details of his scheme, probably on the basis of a compensation to be paid to him for each Spanish ves-

pel destroyed. An important phase to the military program is a decision not to take up the details of organizing the new force of 75,000 volunteers for at least a week ten days. In th clusion has been reached as to whether atranged for another of its popular sevena portion of the 75,000 volunteers will day personally-conducted tours to the battle-be used to recruit the regiments still field of Gettysburg, Lumy Caverns, and remaining unfilled under the first call Washington, to leave New York and Phila-for 125,000 volunteers. The war department is anxious to obtain the views of the governors of the states and territories in regard to the filling to their miximum strength of the regiments already furnished by them under the first call. flour made. There is abundant reason to believe that the naval officials last night received dispatches from Admiral Samp son. The press dispatches had already announced that the dispatch boat Dolphin, of Commodore Schley's squadron, ran alongside the flagship New York, which was then off Havana, and in-formed her that she bore dispatches for Admiral Sampson from Commodore Schley. It is considered probable that these dispatches contain information of the precise whereabouts of the Cape Verde squadron, and quite naturally the information would be sent to the naval authorities here at once.

consumption ever known, the iron in-dustry has made surprising progress in new orders, which reached about 100,000 tons in burs alone, over 50,000 having been placed at Chicago and 15,000 at Wheeling, multily resulting from the ordinary demand for agri-entitural implements.
