The reason for delaying thus far was the absence of actual necessary supplies, which in most cases were stored away in some of the thousands of freight cars which blocked the railroad tracks many miles out of Tampa. It is now believed that

the troops have their supplies. By the reports of the breach Sampson has made in the coast defenses at San-tiago there is every reason to believe little difficulty will be found in the netual debarkation of the troops, particularly if marines are already ashore to guard the landing. A suspicion is entertained in some quarters that Sampson has hastened his movements at Santiago by the news of the intended departure of the troops from Tampa, and made this attack in order that the navy alone might have the honor of effecting the first occupation of Cuban

It is likely that the first troops of the regular army to take up a posi-tion ashore will be the engineer battal-ion, although they are so badly hampered by the heavy siege trains they carry that they must be greatly delayed in making a landing. These guns, by the way, have given infinite trouble, for the transports that were hastily chartered were so lightly constructed as to require a great deal of strength-ening before the great masses of steel
