Will Refuse to Go to War. Newport News, Va., June 15 .- The engineers, stokers and ordinary sea-men who have been in service on the acout ships Yale and Harvard will refuse to go to sea on the vessels when they leave this port as auxiliary cruisers. These men were in the employ of the American line when the steam ers were leased by the government, and they signed articles of agreement for one year, but claim they did not enlist in the navy, and therefore cannot be compelled to go into service on a war-ship, especially as most of them are subjects of foreign powers.

Dewey as a Promoter of Rebellion. Madrid, June 15 .- In the chamber of the reported treaty made with the in surgents in the Philippines before the outbreak of the war with the United States, General La Chambre declared that the insurrection would not have revived but for Admiral Dewey's ap-pearance at Manila. The disaster at Cavite was due, he said, to the neglect of the authorities at Manila, "as a few torpedoes laid at the entrance to the channel would have frustrated the Americans." He urged the government to deal with the responsible parties.

Well, where is Shensndosh in this war! Well, where is Shehandoan in this war? It looks as if they have shut the doors and are going to stay at home. It certainly looks had that out of a population of about 18,000 only four have come to the front. Where are all the people who had so much to say about this war? Have they left the town? When the officers went home the first time we backed for some of the Shenaudoub people, to come with them, but they didn't. Now that officers are going home to get more men we will expect to see some come with them from Shenandouh; and if there are none we will begin to think that there are no more soldiers

What the newspapers say about as having it so hard here is true. Some days we haven't crough to eat, and sometimes the meat is stale. But we all knew before we came that we would have to put up with it as our fathers did in 1861.

Chapter on Colds SIMPLE PRECAUTIONS THAT MAY PREVENT

SERIOUS CONSEQUENCES. The Danger of Neglecting a "Common Cold."

Serious and Often Fatal Maladies may Result from Carelessness.

From the News, Harrisonbury, La.

In most instances colds are the result of imprudence or a lack of forethought. Even in cases where a sudden change in the weather or an unavoidable exposure is responsible for the first slight cold, frosh and more severe colds may be avoided by observing a little care. But "a mere cold "is such a common thing and causes so little incent entence that notwithstanding all previous experiences we neglect to take the most simple precautions, in the way of warring suitable clothing, the avoidance of draughts, etc.

Che should always bear in mind the necessity of exercising a constant vigiliance to avoid catching cold. When the temperature in the house of hydrother than that out of doors, never go out without putting on an additional wrap. Never sit in a cold room even though you do not feel chilly. And it is better to suffer a little discomfort from wearing heavy underelothing than to runting lefter from a lady in Sciely Island, I.a., granhically illustrates the discomfort grand and reverse. modifical wrap. Never sit in a cold room even though you do not feel chilly. And it is better to suffer a little discomfort from wearing heavy underelothing than to run the risk of a chill.

The following letter from a lady in Sicily Island, La., graphically illustrates the distressing consequences that are liable to follow a simple cold.

"In February, 1896, I had a severe cold which settled on my lungs, weathing in a certous cough. My appetite falled, and I became so weak that I was scarcely able to walk across the room. I weighed only ninety-four posside, and had gives up all hope of recovery when I happened to read an article in a newspaper describing some
