### PECULIAR POISONS.

GENERATED IN THE HUMAN BODY

The Result of Imperfect Digestion of Food.

Every living thing, plant or animal, contains within itself the germs of certain decay and death.

In the human body these germs of disease and death (called by scientists Promaines), are usually the result of imperfect digestion of food ; the result of indigestion or dyspepsia.

The stomach, from abuse, weakness, door not promptly and thoroughly digest the The result is a heavy, sodden muss food. which ferments (the first process of decay) poisoning the blood, making it thin, weak, and lacking in red corpuscles ; poisoning the brain causing headaches and pain in the eyes.

Bad digestion irritates the heart, causing palpitation and finally bringing on discase of this very important organ.

Poor digestion poisons the kidneys causing Bright's disease and diabetes.

And this is so because every organ, every nerve depends upon the stomach alone for nourishment and renewal, and weak digestion shows itself not only in loss of appetite and flesh, but in weak perves and muddy complexion.

The great English scientist, Huxley, said the best start in life is a sound stomach, Weak stomachs fail to digest food properly because they lack the proper quantity of digestive acids (lactic and hydrochloric) and peptogenic products ; the most sensible remedy in all cases of indigestion, is to take after each meal one or two of Stuart's Dyspepsia Tablets, because they supply in a pleasant, harmless form all the elements that weak stomachs lack.

The regular use of Stuart's Dyspepsia 'Tablets will cure every form of stomach trouble except cancer of the stomachi-

They increase flesh, insure pure blood, strong nerves, a bright eye and clear complex ion, because all these result only from whole some food well digested.

Nearly all druggists sell Stuart's Dyspepsia Tablets at 50 cents full sized package or by mail by enclosing price to Stuart Co., Marshall, Mich., but ask your druggist first.

A little book on stomach diseases mailed ree. Address Stuart Co., Marshall, Mich.

Another Brief Session of the Joint Commission.

LUMBER INTERESTS OF CANADA.

ARBITRATORS ASSEMBLE

Canadians Declare That Their Commissioners Will Insist Upon Free Logs and Free Lumber or No Change at All in the Existing Tariff.

Quebec, Sept. 21 .- The international commissioners mot in joint session for an hour yesterday afternoon and ad-journed to meet again at 19:30 a. m. tomorrow. The adjournment over today is taken because of the ceremonies altending the unveiling of the Champlain monument, in which the members of the high commission are to participate. The American commissioners met as usual at 9 o'clock in the morning, and

again at 4 p. m. They listened to the arguments of Mezirs. Babcock of New York and Fallon of Ohio, who represent the interests of the United States. Inland fisheries. As usual, all the proceedings were be-

hind closed doors, but so far as the fresh water fisheries are concerned it is understood that the Americans and Canadians will agree with little trouble. Both sides desire the better protection of the fresh water fish, and no doubt this part of the proposed treaty will readily be disposed of.

Today the interests of the United States farmers are being heard. A number of the border states may be represented, but as yet the American commissioners have heard only from the national grange. Aaron Jones, of South Bend, Ind., worthy master of the south isend, ind., worthy master of the grange, and Secretary John Trimble, of Washington, D. C., appeared before the commissioners. It is presumed that they will protest in a general way against the reduction or removal of the tariff on Canadian agricultural products, especially barley, hay, oats and

potatoes The indications are that the Canadian commissioners are going to take a very determined position on the lumber question. Hon. A. S. Hardy, premier of Ontario, and George W. Ross, minister of education, arrived here yester-day, and they represent the Ontario government on the lumber question. They declare unreservedly that no concessions till be made on the part of the Canadian government in the way of permittion, logs to go free into the United States unless the United States makes some concession in the way of reducing or removing the present duty of \$2 per thousand on Canadian sawed

Last year the Ontario legislature passed a law that no logs cut on crown lands by American lumbermen should be taken into the United States to be sawed into lumber in American mills. This law was no doubt a result of the \$2 duty put upon all Ca-nadian lumber in the Dingley law, but has been a disastrous law to such of the American lumbermen as own large tracts of crown timber lands in On tario. These lumbermen contend that the Canadian government knew when it sold the ber to the Americans that it was to be sawed in American mills, and, having this knowledge, the government has no right to pass a law of this character. But the Canadians waive that point, and say it must be free logs and free lumber or no change at all.

Clark Wallace, former minister of customs, now representing the Canadian Manufacturing association, also arrived here yesterday for the purpose of conferring with the Canadian commissioners. He counseled the Can-adian commissioners to stand by the protective duty upon certain manufac-tured goods sent into Canada from the United States. Textile and manufac-tured iron implements are the principal articles upon which he urges that no reduction be made. He says the Canadian manufacturers are all the time growing, and American free importations would paralyze them. C. M. Hays, general manager of the Grand Trunk Railroad company, has been in consultation with both the American and Canadian commission ers, and states that there will probably be little difficulty in settling the bonding question, the alien labor question and other matters in which the railroads are concerned. He says the views of the commissioners on both sides are along the same general lines. Although nothing is revealed to indicate what progress is being made by the commission or what results are probable, Senator Fairbanks, chairman of the American delegation, gives the assurance that the achievement so far is gratifying and indicative of satisfactory results in the end. Just how far they have gone in the way of adjusting any one of the main questions, or what the prospects are for a general reprocity treaty, the commissioners will not say, but repeatedly assert that they are "trying to get together," and

THE EXCLUSIVE USE OF THE WORD "CASTORIA," AND "PITCHER'S CASTORIA," AS OUR TRADE MARK.

I. DR. SAMUEL PITCHER, of Hyannis, Massachusetts, was the originator of "CASTORIA," the same that has borne and does now bear the fac-simile signature of that H. Flitchers wrapper. This is the original "CASTORIA" which has been used in the homes of the Mothers of America for over thirty years.

LOOK CAREFULLY at the wrapper and see that it is the kind you have always bought and has the signature of that H. Flitchers wrapper. No one has authority from me to use my name except The Centaur Company, of which Chas. H. Fletcher is President. March 24, 1898.

### Amud Pitcher m. D. Do Not Be Deceived.

Do not endanger the life of your child by accepting a cheap substitute which some druggist may offer you (because he makes a few more pennies on it), the ingredients of which even he does not know.
