Gentleman. No trouble is more common or more misunderstood than nervous dyspensia. People having it think that their nerves are to blame, are surprised that they are not swed by nerve medicines and spring remedies; the real seat of mischief is lost sight of; the somach is the origin to be looked after,

Nervous dyspepties often do not have any pain whatever in the stomach, nor perhaps General Wheeler was on the stand the any of the asual symptoms of stomach weaks areater part of the day. The men as-serted that the only trouble was that they had too much, and a matter of fact no soldiers had ever been so well General Wheeler asserted that it was true some of the employes had used articles intended for the sick, and he had been told by some ladies that physicians had used some of the articles, including appollinaris water, provided for the hospital. He had is-sued an order for the arrest of those engaged in such a practice. He had himself seen a boy distributing oranges among his fellows. "They were," he said, "undoubtedly individual cases of suffering and of neglect, but they were the exception."

FIRE ON THE OBDAM.

The Transport Ship Compelled to Return to Santiago.

BRAVE SOLDIERS UNDISMAYED.

They Removed a Large Quantity of Ammunition From Close Proximity to the Fire With as Much Self Possession as Though on Parade.

Santiago, Oct. 5.-The United States transport Obdam, which left here on Saturday, has returned with her bunkers on fire. The presence of fire was discovered Monday near the main hold. which was at once flooded with 50 tons of water, and a gang of men was put to work removing the ammunition, of which the ship carried a large supply All the officers and solders who were well enough to do so worked hard to extinguish the flames. Every means available is now being employed to ex-tinguish the fire, and it is hoped she will be able to leave here again in two

or three days time.

The officers and passengers declare that the coolness displayed by the men was wonderful. They all knew that the ship was carrying a large consignment of ammunition, but they worked and behaved with as much self possession as though on parade.

As soon as the fire was discovered the Obdam's captain summoned the military officers and consulted with them as to the best course. All were anxious to continue on the voyage, but they decided that the danger of an explosion was too great. Nothing re-mained but to return to Santiago, Captain Baker, captain of the port here immediately set 200 men to work at the pumps and soon began to get the fire inder control. Spontaneous combustion is believed

to have been the cause. Naval officers here condemn the practice of carrying large quantities of ammunition on ships that are bearing sick troops, and they also consider the use of small coal-mostly dust-as ballast dangerous. Stress of business will delay General Wood leaving for Manzanillo, but he will leave probably before the end of the week. During his absence he will

be represented by Colonel Willy, Heuenant governor. Naval Constructor Hobson is taking the guns of the Vizcaya to Guantanamo, after which he will return to the cene of the wreck and endeavor raise the vessel. He thinks it prob-able that he will succeed.

A local undertaker will take to New York the remains of Lieutenant Wikoff and Private Skinner.
