THE Supreme court of the United States has decided the joint traffic association unlawful. The marrow of the case is set forth in the announcement of Judge Peckham. He said the court concluded that the railroads were within the constitutional power of Congress to regulate, and that being concluded, the only question left before the court was whether it was policy for Congress to adopt the regulating measure, and that the court had nothing to do with the policy of Congress. From the nature of the railroads they are within the power of Congress. Thus far the courts may decide. But as to the policy of Congress in enacting legislation that prevents joint action the courts have no jurisdiction. Congress is a factor. of government not amenable to the judicini branch.

PRESIDENT MCKINLEY has addressed a protest to the Spanish goyernment, and, while it carries no threats, it is probable that Spain will understand. Spain is the vanquished nation. Being the victor, the United States has been generous. Spain imposes on good nature and tries to better herself at the expense of the tolerant victor. It is not necessary to argue the case. Spain knows what is right and what is wrong, and if decency does not characterize Spanish behavior the intimation that warships might go to Havana if American requests are not complied with will meet the approval of the country. The war is over, and the best way to keep it finished is to show such force as is necessary if Spain refuses to accept all the results in proper spirit. The abandonment of the Cuban debt question is an indication that Spain fully appreciates the situation
