R. P. PORTER'S REPORT.

Our Commissioner's Observations in the Island of Cuba.

TARIFF REVISION NECESSARY. The Spanish Fariff Constructed on the

"Heads Spain Wins, Talls Cuba Loses" Idea-The Rapacity of the Spanish Officials in Cuba. Washington, Nov. 16.-Hon. Robert

P. Porter, special commissioner for the United States to Cuba and Puerto Rico, yesterday presented his report to the president and secretary of the treasury. The report submitted contains about 60,000 words and goes very fully into the financial and economical conditions of Cuba, analyzing the budget of that island for 14 years, showing the sources of income and the causes of expenditure. There are some supplementary reports yet to be made. The following extract from a letter

written to Commissioner Porter by General Gomez will be read with in-"I must congratulate you cordially

for the high mission which you have had entrusted to you. I am completely indentified in all and with all concerning it. On my side I am doing all I all men of good will should join us in ness of all kinds, and our struggle."

Mr. Porter examined both in the nesses, all of whose testimony is pub-lished in the appendix to the report. says:
"My nerves were so approval of the secretary of the treas-ury a complete revision of the tariff in nervous, that I could not the form of a new bill, which will be examined by the experts of the treasury department and if approved will sleep nights. I would get up in the morning the feeling so weak and tired, ury department and if approved will be promulgated by the president and take effect at the port of Cienfuegos
Dec. 1, that being, in all probability,
the first important port to come the first important port to come into the possession of the United States. Commissioner Porter says:

"The Spanish tariff was made by Spaniards for Spain, in the interest of the Spaniards. That seems to be the only principle in it. On any other theory it was inexplicable. The rates were full of inequalities and were not levied on any sound principle by to a levied on any sound principle by the cold and the next be all perspiration. I levied on any sound principle, but on the 'heads Spain wins, talls Cuba loses' idea, which prevails in the whole fiscal fabric

"The cupidity and rapacity of the Spanish official in Cuba is beyond conception, and if we may judge by the results at Santiago the United States officials will be able to collect as much revenue on a tariff the duties of which are nearly two-thirds less than under the iniquitous law now in force. The reduction to a reasonable rate of duty in certain schedules, such as those relating to machinery, railway supplies, etc., will increase the importation, and the revenue will certainly be greater pany naturally hesitated to import a otive when the duty was equivalent to the value of the engine. With a revised tariff of 25 per cent, for Cuba has no locomotive works, it may import two, or four, or even six. The same is true of a variety of other articles." Mr. Porter gives a table showing the average annual custom house receipts

in the Island of Cuba from 1886 to 1897, inclusive, to be \$12,645,894. In an interesting analysis of the Cu-ban budget showing how much revenue is required and how much may reasonably be expected from the tariff to be enforced Mr. Porter says:

"The money collected from Cuba, whether it was \$26,000,000 or less, has all gone, and nothing is likely to be of receipts given by the government for ncluding the salaries of a large number of minor officials. The first and most important item of expenditure is for sovereignty expenses, and aggregates a sum exceeding \$22,000,000. The largest item is that of the interest on public debt, which aggregates \$10,435 .-

An important subject in the report is that in relation to the currency. Says

"Although Cuba is afflicted with many kinds of depreciated currency.

Caused a Frightful Railroad Crash in Canada.

TWELVE KILLED, A DOZEN HURT.

Several Cars Smashed Almost to Splinters and Both Engines Destroyed. Baggage Car Driven Into a Second Class Coach and Passengers Crushed.

Tranton Out. Nov. 16 -A Grand Trunk express train bound for Toront. crashed into a moving freight train near Murray Hill crossing, two miles west of there, and several cars were smashed almost to splinters. So far as known 12 people were killed and a dozen or more seriously injured, misplaced switch was the cause of the accident, the westbound train taking the wrong track, on which was the eastbound freight.

The express train consisted of ex press, mail and baggage cars, a second c'ass car, one first class coach and two Pullman sleepers. The second class car was next to the baggage car and ahead of the first class coach and sleepers. It was pretty well filled with people, there being twenty or more passengers in it and hardly any of them escaped with out injury.

Between Belleville and Murray Hil rossing the westbound express usually eaves the single track and takes the double track, and it was about a mile and a half west of this point where the accident occurred.

Whether the signals were right or

not will never be known, the engineer and fireman of the wrecked train being both dead. Both engines were totally destroyed, and the freight was thrown

The engineer and fireman of the freight engine, Thomas Ivens and Alex Toppin, both of Toronto, jumped and escaped with slight injuries. W. H. Brady, engineer, of Believille, and John McDonald, fireman, of Believille, who were in charge of the passenger en-

gine, were killed.

The greatest destruction was wrought pletely through it, the passengers be-ing crushed and mangled underneath the timbers of the car. The mail car was forced right on top of the baggage car, and the express car was partially wrecked. The first class car was uninjured, as were also the two sleepers, although the passengers were awakened by the shock. The work of pulling out the dead and injured was com menced immediately. the established basis is strictly gold. Indeed, there is something almost pathetic in the manner in which Cuba, though plundered and depleted of her from a gold basis. The testimony taken and statements made on this subject have been unanimously in favor of a continuous gold basis, for the Cubans have suffered so much from Spain's vari-

Mr. Porter then takes up the ques tion of taxation, and suggests the abolition of certain taxes, especially that known as the "consumption tax" on the killing of cattle, which is an exaction that greatly increases the price of food to the people. "This tax." says Mr. Porter, "like many others, is simply farmed out to private firms or corporations, whose emissaries in its collection become a constant menace to thrift and industry in their respective districts. Another tax which will to be in the ruins of the house. fall down of its own weight is the "cedula." or head tax, which varies in reled over money matters. amount from a few cents to \$100, acthe individual. Curiously enough, this tax when not collected becomes a greater source of injustice and annoyance than when collected. It is generally allowed to run until some occasion comes for the unhappy victim of
