## Prevent Pneumonia

Prevention is always better than cure, even when cure is possible. But so many times pneumonia is not cured that prevention becomes the natural act of that instinct of self-preservation which is "the first law of nature." Pneumonia can be prevented and is often cured by the use of Ayer's Cherry Pectoral.

"Some years ago I had a severe cold and was threatened with pneumonia. I could neither eat nor sleep, and was in a wretched condition. I procured a bottle of Ayer's Cherry Pectoral and took it according to the directions, and at the end of fifteen days as well and sound as before the attack. I have recommended it in many cases of pneumonia, and have never known it to fail in effecting a cure."

JOHN HENRY, St. Joseph, La.

"I was attacked with a cold that settled on my lungs, and defied the skill of my physicians so that they considered me incurable. At last I began to use Ayer's Cherry Pectoral and was entirely cured after having taken two bottles."

FRANCISCO A. SEVERIANO,  
Taunton, Mass.

## GRAND JURY REPORT.

Make Many Recommendations and Are Complimented by the Court.

The report of the grand jury shows that they acted upon 121 cases of which 87 were returned as true bills and 34 ignored. Of the latter the costs were placed upon the prosecutors in 27 cases and only 2 upon the county. The county prison was found in excellent condition, and the following recommendations were made: The small court in the rear be paved, a new kitchen range, a telephone placed in the building, and the dining room to be better supplied with queensware and table linen.

The almshouse was found scrupulously clean, good order maintained, and they recommended the retention of Steward Evans by the new Board of Poor Directors, as it would be a saving of money to the county. A new slaughter house and ice house is recommended, as well as fire escapes and larger reservoirs as there is insufficient supply of water. The dilapidated condition of the bridge at Landingville is noted.
