OUR COUNTRY: First, Last and Forever.

The Lesson That Abides.

Since the close of the war with Spain the country has been deinged with fervid, patriotic oratory and passionale appeals through the press in behalf of Greater America and its alleged obligations to humanity comments the Philadelphia Star.

An outsider temporarily sojourning within our gates might have supposed that the whole nation was receiving a new baptism of loyalty and manifesting afresh its devotion to the highest principles of human governmend

Unfortunately there is such a thing as intional hysteria. The montitude is aften aillieted like the todividual. Overstrained nerves will give way and exhabitions of weakness are sure to Tollow. True patriotism is the essence of throngs honestly believed and the spirit of justice faithfully carried out. The great Republie restaupon noble aspirations, ideal-Ized and exemplified.

The immortal Declaration was not merely the passionate atterance of a trying and perilous hour. It embodied in wonderful words the deliberate judgment and purposes of mighty men, who looked forward as well as backward; who stood at the parting of the ways and summoned all mankind to witness a new and permanent departure in affairs of government. It was intended to bind the infant nation, thus crystalized into a living and inspiring force, in the bonds of an indissoluble union. It was a please of inviolable goodervation of the rights of all. It detional firmament a solemn warning and a sacred obligation that should never be broken.

How many of even these patrictic participants and Fritz Seffen were also polsoned. realize the lesson that should abide with the descendants of the ragged beroes of a hundred and twenty years ago? How many fully comprehend the heavy responsibilities of this hour, the occasion of festivities, the duty to humanity and to country involved in the execution of the trust of sitizenship in our day I flow many rightly consider the apportunities to help the needy, to rescue the fallen, to strengthen the weak, to feed the hungry, to clothe the naked, to bind up broken hearts, to save wrecked lives, to comfort sorrow-stricken

The true spirit of humanity must ever be mindful of these things. Outwardly the nation is marvelously great and strong, prosperous and happy, yet in every community there is a call for help that is imperative. The battle with want and suffering is ever on, and in this town more men will go to bed hnngry than ever saw Valley Forge, and to these must be added twice as many helpless women and suffering children.

In a land of freedom, good govern ment, industrial prosperity and social order, it ought not to be. Patriotism means love of country and true re gard for human kind. The long, dark days of winter are upon us, and woe abides in many worthy homes. The sweep of physical disorder intensite the sorrow and distress. Let the opportunity and the duty go hand in hand. Let the fearful spectacle of want not be permitted to tarry in our midst while the more fortunate for theirs. There are about 1,500,000 are enjoying the pleasures of this tention of the government is that the

THE NICARAGUA CANAL.

Report of the Commissioners Expected In a Few Days.

Washington, Dec. 27.—Admiral Walk-er, chargean of the Nicaragua canal commission, when questioned as to the time when the report of the commission would be sent to congress, said that the time could not be stated lefinitely, as the report had not been to further inquiries the admiral said that there were no differences of question of cost, and that difference might be adjusted so that the report would be unanimous on all points.

Some months ago Admiral Walker

stated to a committee of congress that in his judgment the canal would not cost more than \$125,000,000. Another member of the commission fixed the maximum at \$140,000,000, but stated that it might cost considerably less, and it had been the opinion of the third member of the commission that the canal would not cost more than \$90,-000,000. All were agreed, however, that those figures were and could be only approximations. There were too many considerations and contingencies that night change the result materially. All that the construction of the canal or the route proposed is entirely feasible and should be prosecuted with all rea-
