AUTOCRATIC GERMAN PRESIDENT

He Ordered the Release of a German Resident of Apia Who Had Been Sentenced by Chief Justice Chambers to Imprisonment For Rioting.

Auckland, N. Z., Feb. 2.- The following advices have just been received here from Apia, Samoan Islands: There has been no further general fighting between the partisans of the

rival chieftains since the last advices were forwarded, except that a party of Mataafa's followers was routed in the bush by Malletoans. It is expected, however, that fighting will be resumed, as Matanfa is rearresting persons who have been already fined and released.

The work of pillage continues, among

Osbourne and Maxse jointly replied in their official capacity that, the proper tribunal having dealt with the matter, the consuls could not interfere. More than this, they declined to have further intercourse with the German consul or the German municipal president, except in writing, or to attend meetings, except to consider the acts of the municipal council of Apia, unless an apology, with full retraction, were offered for the behavior toward Chief Justice Chambers. At the same time the supreme court summoned Dr. Raf-fel for contempt of court in releasing Herr Grosmubl.

NEEDS OF THE CUBANS

Ex-Minister Taylor Discusses the Affairs of the Island.

THE NEED FOR SPEEDY ACTION.

Our Government Should Advance Money to Pay the Cuban Soldlers and Transform Idle Men of Gomez's Army Into Peaceful Wealth Producers.

Mobile, Ala., Feb. 2.—Hannis Taylor,

ex-minister to Spain, who returned on Tuesday from a two weeks' visit to Cuba, has given the press the following interview on the Cuban situation: While in Cuban upon purely private business I came in contact with the leaders of every faction into which the pupulation is now divided. The extremes of opinion are represented on one hand by Cuban military chiefs demanding immediate and absolute independence; on the other by the purely Spanish element seeking protection under our flag. Between the two extremes are ranged the main body of the people standing in an expectant attitude, ready to give their approval to any plan that will re-establish law, order and material prosperity upon a permanent basis.

"Upon one point all agree-American officers and Cubans- and that is, outside of the cities the country, is in a condition of want and misery that can hardly be explained. As an aggra-vation of that condition stands the Cuban army, composed of at least 30,000 idle men, waiting with arms in their hands for such a settlement of their duties as will enable them to resume life again.

to speak for the army what sum would suffice for a satisfactory settlement they said \$10,000,000 or \$11,000,000 at least, a sum that would give about \$300 to each man. With that, they said, the small farmers could procure stock and live until they could make a crop. The Cubans neither ask nor desire us to contribute a penny for the payment of their army. All they ask is that a loan should be made for the purpose charges upon their custom houses, now yielding from \$12,000,000 to \$15,000,000 i year, the proceeds to be paid to their soldiers through the military authori-ties. Every class there is demanding that a settlement be made at once, so that a menacing and idle body of men may be converted into peaceful producers. In that way the industries of the country could be revived, and a force dissolved like the army of Gomez, which is not only a military party but the predominant party of the isl-

"I cannot doubt if the just claims of the Cuban army are treated with injustice and contempt and the present military regime continued indefinitely in a short while we would be hated by the Cubans just as the Spaniards were, and a change of things brought about that will force us either to withdraw from the islands or to govern there just as Russia does in Poland. Wise and humane as our military governors are, the fact remains that they govern by the sword, in defiance of the civil power, and the result is that patience and discontent are already manifested on every hand. The urgent need in Cuba now is a prompt and satisfactory settlement with the army of the revolution, and establishment as soon as possible of a provincial civil regime in which Cubans themselves can have a voice.

"The president should labor unceasingly to attain both ends, and in the effort to do so he should have the cor-dial co-operation and support of all patriotic and liberty loving men, re-

gardless of party. "We should learn from the English how suicidal it is to carry our party difficulties into our foreign affairs. The patriotic instinct of Mr. Bryan hit the mark when he urged the immediate ratification of the pending treaty and the settlement of all difficulties after-

SHOEMAKERS' WAX.

Experiments With This Substance That Will Surprise Every One.

One of the most apt illustrations ever made by Lord Kelvin was his likening the luminiferous other to a mass of aboemak-ers' wax. What Lord Kelvin said of shoemakers' wax may be tested by any boy in a manner that will astonish his playmates. First let it be said that the ether pene-trates all space. It is as rigid as steel and yet so fixible that it does not retard the passage of planets through space in the least. It is an invisible substance which travels in waves through all things. Now, to Illustrate the nature of such a paradoxleal material Lord Kelvin searched every where and at last concluded that shoe makers' wax represented it best. He made tests and this is what he found:

He melted some wax in a common glass tumbler. After it had hardened he tried to thrust a lead pencil through it. It would not go. Then he placed a coin on the surface of the wax and left it there for several days. When he again visited it. the coin had sunk to the bottom of the glass. The wax had closed over it and by lifting up the glass and looking through the bottom he could see the coin lying there. Had the wax been as deep as a well the coin would have gone on sinking un-til it reached the bottom. This proved that the wax would conform only to very slow movements. If he had tried to push It too fast, it would have resisted him.

An idea struck the scientist. If the wax

acted like this toward the coin, how would it treat an object which floated? He ac cordingly placed a cork in a tumbler and poured hot shoemakers wax upon it. The wax hardened with the cork at the bot-tom. Yet when Lord Kelvin looked at the bottom of the glass in a day or two he found the cork had disappeared. It was somewhere in the mass of wax and probably rising very slowly, but surely, toward the top. Sure enough, after a given period of time the cork peeped above the surface of the hard wax and finally it rose to point where it remained half imbedded in the wax, just as it would have done in a glass of water It rose no higher than this nowever, and a corkserew probably would not have pulled it from the wax. own buoyancy had raised it up from the bottom, through what seemed an impens

trable mass of wax.

This, in fact, is the peculiarity of shoemakers' wax, that it resists all sudden or quick movements, but is highly susceptible to very slow and prolonged pressure. If you pressed a flatiron hard down on a lump of wax on a table it is probable you would make no impression on it, but if you left that iron resting on the wax for a day or two, you would find the lump flat-tened out under the Iron. So curious is this property of the wax that tuning forks have been cast from pieces of it. These forks were capable of vibration, giving a musical note and being set going by vibration for another tuning fork, yet when on of them was laid across the open mouth o a jar it slowly collapsed and fell into the jar in a shapeless, sticky mass. Any boy may perform these experiments, and the lesson in physics to be got therefrom is no less valuable than the amusement which the performance affords - Cincinnati A HELPLESS CHILD.

A weak and puny child is almost as much abandoned to its fate as if it was left alone on a chimney-top. It is isolated from the healthy enjoyments of its little fellow-beings. It cannot partake either of their play or their sturdy work and progress in the world; its whole life is embittered by incapacity and weakness.
Any woman who expects

to become a mother ought to know what Dr. Pierce's Fa vorite Prescription will de both for her own health and safety during her time of trial and also to insure her in be-queathing a fair measure of health and strength to the prospective little one.

"Some months before my baby came I found myself in rapidly falling health," writes Mrs. W. J. Kidder, of Hill Dale Farm (Rnos. Enosburg, Vt., in a grateful letter lerce, of Buffalo, N. V. "I suffered un bleather and the control of the control of

baby hoy."
There never has been a remedy in the history of medicine that has done what this marvelous. "Favorite Prescription." has plished for weak, ailing women It's an insult to your intelligence for a dealer to attempt to palm off upon you a substitute for this world-famed medicine. You know what you want. It's his business to meet that want. When he target some substitute he's thinking of the larger profit he'll make—not of some welfare.
