HEALTHY MATERNITY.

Two Grateful Women Tell of the Help They Have Received From Mcs. Pinicham.

The climax of life force in woman is capable motherhood. The first requisite for a good mother is good health. Health of body means health of the generative organs.

Read what Mrs. G. A. NONNAMARER, Blufton, Ohio, says about Lydia E. Pink-bam's Vegetable Compound, and how well it prepared her for maternity: DEAR MRS. PINEDAM: - I must say a word

in praise of your Vegetable Compound. I used three bottles of it when I was pregnant, and labor was not nearly as long as it was with my other babies; and my baby is so healthy to what the others were. I think every woman should use your Compound when pregnant, it will save them so much sufferng and misery. I cannot say enough in braise of it. If ever I need medicine again, I shall use your Compound."

The most successful tonic known to

medicine for women approaching ma-ternity is Lydia E. Pinkham's Vegetable Compound. It is a safeguard for every woman who uses it, and the fullest benefit comes from its use with Mrs. Pinkham's advice freely offered to all woman. Her address is Lynn, Mass.

Here is a convincing statement. bearing directly on this subject, from Mrs. E. Bisnop, of 1848 Pacific St., Brooklyn, N. Y.: "Dear Mrs. Pinkham:—I am s

great believer in your Compound. I was almost despairing of ever again being K, as I was a great sufferer, and had been for years. I suffered from womb ouble, and had terrible blind fits. After writing to you I tried your Comyound. The result was ustonishing. I have used it and advocated it ever since. In childbirth it is a perfect boon. I have often said that I should like to have its merits thrown on the sky with a search light, so that all women would read, and convinced that there is a reme dy for their sufferings.

travel north and to face the north as a magnet does, and that this tendency had upon a cat as a lightning conductor on a small scale, and that according to its temperament, negative or positive, did in face north or south, or just as the points of its fur were attracted by the negative or positive poles of the earth. I was led to this by some observations that I had made some years previously in a London suburb. Then I noticed that the cats of that particular district had a tendency to walk in particular directions on the walls that faced the north rather than to walk on walls that ran east and west.

As to the idea that cats are good venther gauges, I do not credit that. I believe that the reason a cat washes itself over its cars or not is bound up, with the particular method by which the particu-lar animal cleans itself. Its main object in washing, to my mind, is just to complete an electrical circuit, for by so doing it generates heat and therefore a pleasing ensation in its fur.—Cassell's Magazine.

Pleasures of Boarding Round,

Many of the experiences of the student doctor in "boarding around" a generation ago are amusing. One tells the story that when he arrived at his new boarding house after school one day the old lady intimated to him that it was customary for the boarding teacher to lend his services for the benefit of the household and informed him that just then the old man and the boys were out in the barn killing swine and would no doubt be pleased to have his assistance. This the embryo doctor declindasher, only again to meet with the doc-

This he undertook, but be-fore the lapse of ten minutes the uppermost feeling in his mind was regret that he had not helped the old man and the boys in the barn, exercised on the churn dasher or undertaken any other job in the bousehold economy rather than that of tending baby. He had previously passed very fair examinations in physiology, anatomy and the mechanical sciences, but never until then did he learn that a baby has no bones in its body, and he also made the discovery that an infant has no center of gravity, somewhat to its danger and Sal's

An Apt Comparison. When Tempson's "In Memoriam" ap-peared, a certain poet was standing in the Old Corner Beakstore in Boston, turning over the leaves of the new volume, when a literary friend of rare fasts and learning

in poetry stepped up and said to the poet, "Have you read it?" "Indeed I have," was the answer, "and, do you know, it seems to me that in this delightful book Tennyson has done for friendship what Petrarch did for love."

This was too fine for the literary friend to forget. That afternoon he called upon a hely on Beacon Hill and noticing a copy of the same beak on her table saw his opportunity. After the usual greeting he took up the book. "Have you read it?" he asked. Yes," said she, "and I have enjoyed it

What It May Cost the American Visited

In England, though in London at least there are many boarding houses, it to more usual to live in 'lodgings' -that is, more usual to hire a furnished room by itself than to include the taking of meals at the common table. Frequently, however, you arrange to have part of your meals in the house, but served in your own room. In that case you may buy your own ma-terfall and pay for the cooking, or the land-lady will buy what you direct and cook it for a slight charge. In a thoroughly con-venient and respectable location in London \$7.50 a week would be a low price for a plainly furnished sitting room and bed-room and the cooking. You can do bet-tor than that in the suburbs, but distances are long in London, and it is economy to pay for a convenient location if time is

Prices are lower in the smaller English places and the landladies more endurable. Those of London are often so bothersome that many Americans advise against tak ing lodgings there. Figures from the ex-pense book of two American girls who took lodgings wherever they had addresses show that in Lincoln for apartments in a delightfully quaint little house just outside the cathedral close, where the land-lady and everything about the place was spotlessly clean, they paid \$1.40 apiece for the hight's lodging and three meals. In York they had lodging, supper and break-fast for \$1 apiece. At Oxford the same thing with a fine grate fire cost \$1 apiece. In Edinburgh they had lodging and break fast for a week for \$3.50 aplace.

In London and the large cities it is the custom to go out for dinner. London restaurants are more costly than those of the same grade in the States, and so London is not the cheapest place in which to dina. To live in this way abroad is much simpler than at home, for restaurant life is so much more common. It has been said that a third of the people of Paris dine at cases. Women seldom have any serious trouble in finding a restaurant where they can dine unmolested, and a great many of the art students abroad live in this fash-ion, often not spending \$1 a day for the whole cost of existence. Furnished rooms, however, are not so easily to be found in Paris as in London, but they are there.-Robert Luce in "Going Abroad."
