OUR COUNTRY : First, Last and Forever

THE indications are the members of the Legislature will adhere to the resolution for final adjournment on April 20.

THERE is a noticeable absence of enthusiastic editorials in Democratic newspapers over the many recent increases in wages.

DEMOCRATIC candidates for county offices are springing up like mushrooms. Many will wither under the summer sun's rays.

In the light of recent events, there is a universal feeling that Thomas J. Joyce, the ex-editor, was more sinned against than sinning and shall be pardoned to let some one else have his cell.

Isn't this legal holiday business becoming a farce? The legislature has added another one to the large list in this state, notwithstanding that most of them are indifferently observed.

THE Legislative probers resume their work again this evening, when Mr. Coyle, late of Schuylkill county, will tell his story and as a matter of course enter a general denial of the charges made against him.

ONE wonders why the New Jersey legislature in such vigorous language recently denounced the proposed combination of the great coal interests, and yet is so indifferent to the gas, electric and other trusts that are more inimical to the public good. The coal combination was denounced as a detriment to the state and a hardship upon the people, and the legislature called on the Attorney General of the state to prepare a bill that would prevent its operation in the state. Why did they not urge a general law that would prevent all such combinations?

### Defective Legislation.

Legal talent, so far as it may be bill becomes a law without having passed the scrutiny of members of the legal profession. But it often-quite too often-happens that the acts of legislatures are found to be fatally defeetive as soon as an attempt is made to enforce them. Laws which to the layman appear to be all that could be fornia adjourned sine die without electtheir enactment are found to have loop holes big enough for a circus through them.

A case in point has recently occurred in Tennessee. The legislature of that state, at its last session, after Gage sent a message to both houses in factured by the California Fig Syrup Co. grave deliberation, enacted an anti- which he implored the members to procigarette law. It provided severe penalties for selling eigarettes, and the advocates of the measure supposed they had the traffic in that commodity at their mercy.

But the statute says never a word about giving away that sort of goods. No perceptible diminution of the consumption of eigarettes is perceptible in any part of the state. The dealers simply add the price of a bunch of these seductive little things to some other article for which the customer calls, meanwhile tipping the traditional soda fountain wink, and the cigarettes are given away.

It seems strange that this old, familiar blunder in law making should have been worked off again, while thousands of well-informed citizens, earnestly favoring the enactment of an effective law, were watching every inth to the 21st, inclusive. Return tickets step of the proceedings. Perhaps it to be issued on properly validated certificates within afteen days from date of issue. Full framers of the bill. Legislation has suffered many defeats at the hands of its supposed friends, both in this and

### FIGHTING IN HAVANA.

Citizens Attack the Police and Many

Persons Are Wounded, Harans, March 20.—A serious conflict etween the police and people of Hayana Saturday night resulted in much shooting and clubbing. From 30 to 50 people were wounded, some seriously. Among the injured is Police Captain Estampes,

formerly a colonel in the Cuban army. Ever since the police interference about a week ago with the demonstration in honor of General Maximo Garcia, the police have been unpopular with the populace, who jeer at them and declare them inefficient. The trouble occurred at a public mulatro ball in San Jose street. an unsavory quarter of Havana. Many Cuban officers, colonels and captains among them, attended the affair. liceman on duty in that street, follow-Ing orders to prevent a crowd collecting in front of the building where the ball was in progress, asked the group of meato go in or disperse. His request was unheeded, and after repeating it he was attacked by the group, whereupon many men issued from the building, set upon him, took away his club and revolver and handled him roughly.

The policeman immediately notified headquarters, who ordered 20 reserves to the scene of trouble. The crowd had prepared for their arrival. It is said they opened with a revolver fire upon the police, which the latter returned, the shooting being kept up until the ammunition was exhausted. The opponents of the police acted with determination in the affray. Many who were in the building mounted to the roof, which is comparatively low, and fired upon the police from that point. They were ap-parently well armed, and this fact, together with the resolution with which they fought, seems to confirm the belief that the attacking party was mostly made up of Cuban officers, as ordinary civilians would have fled from the revolvers of the police.

Many women were wounded. A report is in circulation that two of the in jured civilians have succumbed to their wounds, but this is not confirmed. Among those seriously hurt are Police man Dontto Aroza, Enrique Munoz and Benigne Vasquez and civilians Jose Dominguez, Etouo Galiano, Alberto Aleja and Irene Roque. It is reported that many were wounded who withdrew hastily, because unwilling to have it known that they were present.

American troops were called to the scene when the trouble was over, and numerous arrests followed. It is reported that another conflict be tween the people and the police took place last evening in the outskirts of Ha-vana, and that two policemen and sev-

eral civilians, all wounded, were con veyed to police headquarters. It is as serted also that two policemen were kill-ed. There is also a rumor that a police-

A traveler in Siberia relates an extraordinary occurrence among the frozen re gions of that country. In the intensely cold nights, he writes in Good Words, the silence was sometimes broken by a loud report as of a cannon. This was the bursting of one of the ice bubbles on a river-a phenomenon I had neither heard nor read of before.

The streams coming down from the hills were frozen on the surface some six to nine inches thick. The water beneath flowed faster than it could escape, and the pressure, on the principle of a hydraulic press, became irresistible. First the clasticity of the ice was seen by the rising of circular mounds some six to eight feet in diameter and from four to five feet high. The bursting point came at last with a report like an explosion. The water escaped, but soon froze again. I have seen res of these ice hillocks in a few versts of the river.
