A great yellow flower which opens and closes to the sun at noon is another novelty. This flower takes only five minutes to open and shut. For one minute it is wide open, showing a white center with golden heart. It opens directly up to the sun and closes tight with drooping head. It varies not one minute in the whole lifetime of the plant. On cloudy days it opens, but its petals point downward, for the stem does not rise as on sunny days. This flower not rise as on sunny days. This flower acts as a clock to the natives. The do-mestic animal of the Ladrones is a small bird called a "laughing donkey." It laughs like a parrot, but has projections at the side of its head which give rise to the name. Another household pet is the Japanese poodle, which is very small and very curly haired. This dog catches its own fish in the lagoons and eats fruit

from the guava tree.

The man who owns a farm in the Ladrones is a rich man, for he can support life without labor. Breadfruit trees grow wild and with the coceanuts are the shade trees of the island. A grove of breadfruit trees to a Ladrone islander is what a herd of western cattle is to a ranchman. Fruit grows all the year round, and every quality of queer edible tropical fruit is found

A very valuable possession is the palm grove, which extends in a belt all across the islands. This grove consists of palm trees which rise side by side so close together that you can hardly, except for the slenderness of the trunks of the troes, penetrate into the depths of the paim for est. They grow vegetable ivory, which in commerce is as good as the elephant tusk. This lvory can be used in all cases that denot call for great durability, and for or naments it cannot be surpassed.—Rich mond Times.
