MAKING COAL BRICKS.

suppenings Throughout the Country Chicago Inventor Has a Compound For Utilizing Waste Dust.

A dispatch from Chicago says that "millions of tens of coal dust bitherto deemed little better than waste are to be reclaimed as a feel through the medium of a new com-Base ballists at Tamaqua have started a pound, which is soon to be manufactured in arent quantities by a concern recently in-

outlined. thracite are to be packed together in mina-Joseph Bannan, a former well-known [he]. turn bricks and shipped in large quantities to all parts of the country, "Gardner Corning, a Chicago man, is the

inventor of the formula, but he will not divulge the constituent elements of the comsition which he says will assimilate with the coal dust.

"He asserts that the use of pitch will make

the artificial cakes give out more heat and

be less productive of amoke than the most valuable species of hard coal. "It is estimated that 1,000,000 tons of real ast are distributed about the country by mine owners. The stuff, which has been regarded as almost worthless, has been used for the bedding of railroads and the reclaiming of submerged lands. As soon as the Chicago manufactory is in working order the concern Mr. Corning heads will establish branch works in different parts of the country con-

venient to the coal centres. "According to the plans prepared by the aventor, the coal dust will pass through several processes before it is turned out in brick form. It is first dumped into a huge receptacle, where it is carried to a boiler beated almost to the ignition temperature of the dust. Then the stuff is mixed with the various ingredients which are to make it practical. Out of this apparatus the com-bined materials fall under a press, which turns the stuff into bricks ready for con-sumption. The apparatus for producing the coal brick is entirely automatic.'

Can't be perfect health without pure blood. Burdock Blood Bitters makes pure blood, Tones and invigorates the whole system.

New Fraternal Order.

Fully six hundred Catholic men from al parts of the state were in Pottaville yesterday, all members of the Knights of Colum hus, a new fraternal order instituted at the county seat yesterday with forty charter members, and is known as Schuylkill Conn cil, Kuights of Columbus, After the initia-tions and the conferring of degrees the new ouncil elected officers, of which the follow ing are the most important : Grand Knight James J. Moran; Deputy Grand Knight, Edward Kenne; Chancellor, Daniel Duffy, Financial Secretary, Edward McLaughlir ecording Secretary, Edward Flanigan. The Kuights of Columbus is a society, the mem bership of which is composed entirely of members of the Catholic faith. It is of Coal Dale, has become partially paralyzed fraternal organization with insurance in the arms. Her forearms and fingers have features.

OUR COAL PRODUCTION. Juited States, at Present Increase, Will Soon Be the Largest Producer. Washington, June 5.- The coal production and consumption of the world during the past 15 years are presented in one of the Cincinnati churches. The rest in some tables just prepared by the of the company sailed last week from Boston treasury burean of statistics. These show that while the United Kingdom is still the largest coal producer of the world, the United States is a close second, and if the present rate of gain is continued will soon become the leading coal producing country of world. The coal production of the United Kingdom in 1897 was 202,000,-000 tons; that of the United States, 179,000,000 tons; Germany, 91,000,000; France, 30,000,000; Belgium, 22,000,000; Austria-Hungary, 12,000,000; Russia, nearly 10,000,000; Australasia, nearly 8,000,000; Japan, over 5,000,000; British where the mining laws are being violated.

No names or places, however, are mentioned. India, 4,000,000; Canada, nearly 4,000, 900; Spain, 2,005,000. No othe The United States has gained much more rapidly during the 15 years under consideration than has the United Kingdom or any of the important coal producing countries of the world, her gain during the 15 years being over 73 per cent and that of the United Kingdom less than 24 per cent. The announcement just made by the geological survey that the coal product of the United States in 1898 was 219, 836,000 short tons, against 226,287,000 for Great Britain, shows that the Uni-Damianovitch, of New York, Priest of the ted States soon will become the leading coal producing nation of the world. As an exporter of coal, however, the United States takes low rank in proportion to its production and stands fourth in the list of coal exporting countries. In 1897 the exportations of coal from the United Kingdom were 48,000,000 tons; from Germany, 12,000,

000; from Belgium, over 6,000,000, and from the United States a little less than 4,000,000. In 1898 the quantity exported was slightly above Australasia comes next to the Mrs. Mary Lee, aged 80 years, and a resi- United States as a coal exporting

000 and Canada about 1,250,000 tons in France is the largest coal importing country, her importations in 1897 being nearly 12,000,000 tons, while Germany imported 6,000,000, Austria-Hunmany imported 6,000,000, Austria-Hun-gary 5,600,000, Italy 4,250,000, Canada nearly 4,000,000, Beiglum nearly 3,000,-000, Russia 2,500,000, Sweden over 2,-250,000, the United States nearly 1,500,-000, and Australasia 1,000,000 tons. Great Britain is also the largest conumer of coal in proportion to popula-

tion, with Belgium second and the United States third. NATIONAL EDUCATIONAL ASSOCIATION

REDUCED RATES TO LOS ANGELES, CAL., VIA PENNSYLVANIA RATLEGAD. For the National Educational Associatio Convention to be held at Los Angeles, Cal. July 11 to 14, the Pennsylvania Railroad company will sell excursion tickets via direct routes from points on its line, to Los Angeles Cal., and return, at rate of single fare for the round trip, plus \$2.00 membership fee. These tickets will be sold, good going June 24 to July 7, and when stamped by Joint Agent a Los Angeles, good to return, arriving at final destination, until September 5.
