#### A Lesson For the Trusts.

The Supreme Court of Indiana has handed down a unanimous decision which will cause the trusts in that state to ponder well before they put into operation any measures calculated to oppress the people, comments the Philadelphia Star. The decision is so much in line with common sense. and is so clearly stated, that it deserves to become the law of the land on the subject of trusts. The universal adoption of a law on the lines laid down by the court would do much to check the unhealthy growth of those monopolies with which the country is at the present time afflicted, and which seem to be rather on the increase than otherwise.

In the city of Portland, Indiana, two companies were granted charters for the piping of natural gas, and the wide. privilege of selling and distributing privilege of selling and distributing it to the citizens. Not content with being competitors for the business, sheep killed. Forty trees in an apple they formed a trust or combination, and raised the price of gas and each rods. The Fox river is rising rapidly. and raised the price of gas, and each company refused to sell gas to any person who had been a former customer of the other, and who had for any reason withdrawn his patronage. zens then appealed to the State Supreme Court, which reversed the decision of the lower court, and rendered an opinion in favor of the people.

In the decision as rendered the following clearly stated opinion was given :

"It is an old and familiar maxim that e petition is the life of traile, and whatever act de perinon is the file of rade, and what is a di-stroys competition, or over relaxes it, upon the part of those who sustain relations to the pub-lic, is regarded by the law as injurious to public interests, and is therefore deemed to be unlaw-ful on the grounds of public policy "

It would be well if such an interpretation of the law prevailed through-ing prepared with the expectation that out the country. Companies possessout the country. Companies possess-ing public franchises, such as the islands by the war department until furnishing of gas, electric lighting, water or street car transportation, should not be permitted to pool their issues. When they do the public is the chief sufferer. The great amount assessment of water put into the stock by the companies, necessitates the squeezing of the public in order that dividends may be paid on these heavily watered stocks. The city of Philadelphia has an object lesson along this line in the combining of all the street car companies under one management. Price 7%c. per hottle. Sold by all have been compelled to submit. The Indiana court holds that the courts have the right to forfeit the charters of those concerns which by consolidating are enabled to hold the public at their mercy. On this point it says : "When the state sieks to destroy the life of an incorporated body it is required to show some grave misconduct, some ast at least by which it has offended the law of its creation, or something material which tends to produce in-jury to the public and not merely that which affects only private interests, for which other adquate remedies are provided. Where, how-ever, the facts disclose that a corporated hiles by uniting with others in carrying out an agree-ment the performance of which is detrimental or injurious to the public, it thereby may be said to offend against the law of its corporation and eumsequently to fredit its right longer to ex-erden its franchise." it says erclass its fra Should the decision become the law of the land, the subject of trusts would be disposed of.

The Hamilton had on board a large number of passengers, many of whom were delegates to a railroad conven-tion at Old Point Comfort. While proceeding at reduced speed and sounding her whistle the Hamilton suddenly ran into the Macedonia, striking her on the starboard side abaft the engine, and cutting into her hull about 12 feet. The shock was ter-

rific and indescribable confusion pre-valled for a time. Order was finally restored on the Hamilton, and the crew were sent to their quarters. The Mace-donia's crew got out their boats as the disabled vessel drifted away from the Hamilton. One of the Macedonia's boats was

lost in the fog. This boat contained Captain Kuffhal, Second Officer Gudeknecht, three passengers (Charles W. Moss, F. W. Wright and Herman Brandt) and eight seamen. As the col-liston occurred but a short distance of Long Branch it is supposed that the missing boat attempted to make the land on the Jersey coast.

The Hamilton was cousiderably damaged, but no one on board was hurt.
