A Wreck From Grippe, Catarrh and Asthma.

### RESTORED WITH BRAZILIAN BALM

I was known as "The Woman who Coughs," for I coughed incessantly. I was a school teacher till my health failed. Catarrh had eaten away the partition in my nose. It had produced Bronchitis, Asthma, dreadful Stomach troubles and weak kidneys. In fact it had gone all through my system, making me an easy victim for the Grippe which left me a wreck in mind and body. This was the condition the doctors left me in, after dosing me with opium, quinine, etc. Then I bought cough cures without end but they only made me worse, I was in despair till I got hold of Brazilian Balm and Toxicola Tablets, They acted like magic from the first, and in a few weeks I was cured and better than I had been in years. Talk about wonderful remedies, the intense heat were very comfort-Brazilian Balm and Toxicola saved my life.

# THE HEALTH OF MANILA

Much Better Than Generally Believed in This Country.

NATIVE PREJUDICES OVERCOME.

Lieutenant Eberly Declares the Fitt-Got Rid of Anti-American Prejudice.

Eberly, flag lieutenant of the Oregon. under Captain Barker, has just arrived in Washington from the Philippines, and brings some interesting de talls of the situation in Manila. Lieutenant Eberly says that the social and sanitary conditions in Manila are better than is generally believed in the United States, and better than would an ax, each man helping himsel be naturally supposed after such a some of the money it contained. short American occupation.

The city has been cleaned on an American plan, the military authoritles engineering the work, with a large force of Chinamen and friendly Filipinos. The Chinamen are relied on for the heavy manual labor. The streets have been cleared of ancient accumulations of fifth and there has been a house to house inspection, w measures and to accept the change from the old order.

in this connection he says it is a favorable sign that the temper of the native population has changed con-siderably toward American occupation When the Oregon arrived in March the native population was dissatisfied and in an ugly humor, even in the city itself. Cab drivers, hotel keepers and other semi-public servants rendered service under protest, and even turned down American trade in some in-stances. Now, however, they have found out that they are paid, a thing they did not seem to be used to, and finding American official promises carried out they accept the new sovereignty cheerfully,

Compulsory vaccination created some opposition among the natives at first, but its beneficial effects being apparent it has also been accepted. Lieutenant Eberly says that the health of Manila is exceptionally good, and that even among the troops on shore there was little sickness from anything

but heat prostration. One of the most important naval moves has been the distribution of the 13 little "tinclads" among the big vessels of the fleet on various stations. Through these small craft he says there is an effective blockade of the whole of Luzon and some boats have been sent to Mindanao, Negros, Cebu and Palawan. Most of the smuggling of arms, ammunition and food since the arrival of the American squadron has been done in small schooners known as bankers," which can run through the island channels where the neet could not follow them. The "tinclads" patrol boats have been doing business with these skimmers of the seas recently, one patrol boat rounding up 13 bans ers in a single trip. It is though that in a short time Aguinaldo will be re-duced to a supply of purely homemade

ammunition The soldiers in and around Manila are now well housed in permanent quarters or nelpe houses, which are built of a bamboo framework, and are cool and dry. Even on the outworks the soldiers had comfortable palm huts

The rains had not started in earnest when Captain Barker and Lieutenant Eberly sailed for home. It was well understood then that the rains would cut off all transportation except by railway, and that is given as the senson for Lawton abandoning San Isidro there being a big swamp between it and the railway that is impassable during the rains.
